MCT-220

Wireless Emergency Button

Provides an ideal emergency signaling solution for people who need to raise emergency alarm calls when they are not close to the control panel.

The MCT-220 works with all Visonic Amber® and PowerMax® control panels and offers multiple additional features that enhance user comfort. For example, when used with Amber systems, it allows users to answer incoming calls when the telephone is not within reach. When used in combination with a PowerMax security system, the MCT-220 enables users to remotely activate X-10 devices such as lights and other home appliances.

In addition to its attractive design, the MCT-220 also includes a special water resistant silicon pocket so it can be installed in wet environments such as showers, factories, gardens, and pools.

Specifications:

- ▶ Operating frequencies: 315, 433, 868, 869
- ▶ Battery Type: 3V, CR123
- ▶ Battery life: 5 years (for up to one alarm per day)
- ▶ Operating Temperatures: 0°C to 50°C (32°F to 122°F)
- ▶ Dimensions: 90 X 35mm (3-1/2 X 1-3/8in)
- ▶ Weight: 110g (3.9oz)

Features and Benefits:

- ▶ Compatible with all Visonic Amber systems and PowerMax control panels
- ▶ Enables remote answering of incoming calls when used with Amber systems
- ▶ Enables remote activation of X-10 devices when used with PowerMax
- ▶ Attractive and compact design
- ▶ Water resistant silicon pocket enables safe use in wet environments such as bathroom, showers, and gardens*
- ▶ Large red button – easily visible during day and night
- ▶ Includes additional internal input for connecting a hardwired device such as an occupancy sensor
- ▶ Low battery indication and alerts are sent to the control unit
- ▶ Back light can be switched on and off
