H4 Video Intercom

The H4 Video Intercom integrates a 3 MP camera with a high-performance intercom and features exceptional wide dynamic range, low-light, noise reduction and echo-cancelling technologies for clear viewing and two-way communication with visitors.

Combined with Avigilon Control Center (ACC) video management software, this secured entry system enables operators to quickly and easily identify and communicate with a visitor before remotely granting access.
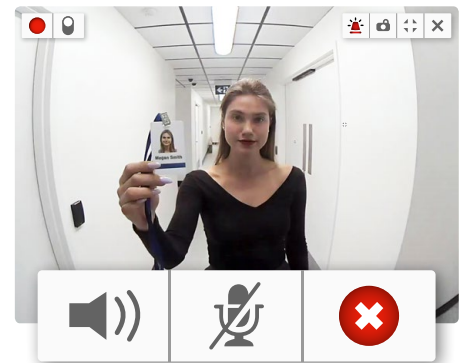

Your First Line of Security

The H4 Video Intercom helps secure main entry points by providing and restricting access, enhancing security while also maintaining convenience.

KEY FEATURES	BENEFITS
3 MP Fisheye Lens	Wide-angle, extended field of view clearly captures individuals of different heights on video.
LightCatcher™ and Adaptive IR Technologies	Provides clear image detail in a broad range of challenging lighting conditions, including nighttime.
Avigilon Appearance Search™ Technology	Incorporates the unique characteristics of a person's face to search for the same individual even if items such as their clothing change over time.
Remote Entry Control	Using ACC™ software, operators can receive, review, and respond to intercom requests and remotely grant access.
Vandal- and Tamper-Resistant Housing	Aluminum construction provides reliable strength and durability in both surface and flush mount models.
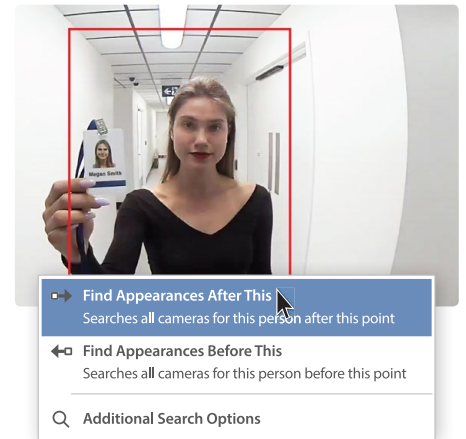

Initiate an Appearance Search

Video from the H4 Video Intercom can be used with ACC software to quickly initiate a site-wide search for a person of interest.
