FCC NOTICE (Class B)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Federal Communications Commission Statement

NOTE- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

European Community Compliance Statement (Class B)

This product is herewith confirmed to comply with the requirements set out in the Council Directives on the Approximation of the laws of the Member States relating to Electromagnetic Compatibility Directive 2004/108/EC.

DISCLAIMER

No warranty or representation, either expressed or implied, is made with respect to the contents of this documentation, its quality, performance, merchantability, or fitness for a particular purpose. Information presented in this documentation has been carefully checked for reliability; however, no responsibility is assumed for inaccuracies. The information contained in this documentation is subject to change without notice.

In no event will AVerMedia be liable for direct, indirect, special, incidental, or consequential damages arising out of the use or inability to use this product or documentation, even if advised of the possibility of such damages.

TRADEMARKS

"AVerMedia" is a trademark (or registered trademark) of AVerMedia Technologies, Inc and has been authorized AVerMedia Information Inc to use. Other trademarks used herein for description purpose only belong to each of their companies.

COPYRIGHT

©2009 by AVerMedia Information, Inc. All right reserved.

No part of this document may be reproduced or transmitted in any form, or by any means without the prior written permission of AVerMedia Information Inc. AVerMedia Information Inc. reserves the right to modify its models, including their characteristics, specifications, accessories and any other information stated herein without notice. The official printout of any information shall prevail should there be any discrepancy between the information contained herein and the information contained in that printout.

The mark of Crossed-out wheeled bin indicates that this product must not be disposed of with your other household waste. Instead, you need to dispose of the waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. For more information about where to drop off your waste equipment for recycling, please contact your household waste disposal service or the shop where you purchased the product.

Battery Safety Information

- Store the batteries in a cool dry place.
- Do not dispose of used batteries in domestic waste. Dispose of batteries at special collection points or return to point of sale if applies.
- Remove the batteries during long periods of non-use. Always remove exhausted batteries from the remote control. Battery leakage and corrosion can damage this remote control, dispose of batteries safely.
- Do not mix old and new batteries.
- Do not mix different types of batteries: alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium).
- Do not dispose of batteries in a fire. The batteries may explode or leak.
- Never short circuit the battery terminals.

**WARNING**

TO REDUCE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE

**CAUTION**

IF THERE IS ANY DAMAGE, SHORTAGE OR INAPPROPRIATE ITEM IN THE PACKAGE, PLEASE CONTACT WITH YOUR LOCAL DEALER. WARRANTY VOID FOR ANY UNAUTHORIZED PRODUCT MODIFICATION

**NOTICE**

- INFORMATION IN THIS DOCUMENT IS SUBJECT TO CHANGE WITHOUT NOTICE.
- THE INFORMATION CONTAINED HEREIN IS TO BE CONSIDERED FOR REFERENCT ONLY.

**LIGHTNING WARNING**

- TO AVOID THE LIGHTNING STRIKE, STRONGLY SUGGEST INSTALLING THE LIGHTNING ROD AT LIGHTNING FREQUENTLY AREA.
- FOR ADDED PROTECTION, UNPLUG THE DVR UNIT DURING THE LIGHTNING STORM. THIS MAY PREVENT TO DAMAGE THE DVR UNIT DUE TO THE LIGHTNING.

1.1 Package Content

- (1) DVR unit
 - a. EB3004 NET b. EB3004 NET*
- (2) Remote Control (batteries included)
- (3) Quick User Guide
- (4) Software CD (User Manual included)
- (5) Power Cord
 - * The power cord varies depending on the standard power outlet of the country where it is sold.
- (6) Power Adapter
- (7) Internal HDD holder (8 screws are included)

1.2 Front Panel

1.2.1 EB3004 NET

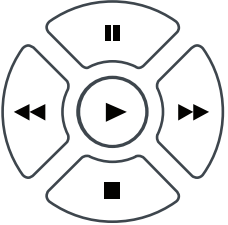

Name	Function
(1) DVR Power LED 	Light when the unit is power on
(2) HDD LED 	Indicate the hard disk running state. Light when the HDD is running (Read/Write)
(3) IR Sensor	Receive signal from the remote control to operate the unit
(4) IR Sensor Port	To connect extended IR sensor cable(optional)
(5) USB Mouse Port	For USB mouse connection.
(6) USB 2.0 Port	Connect to pen drive / external hard disk for backup

If the external hard disk is first time using, please format to FAT32 format.

1.2.2 EB3004 NET⁺

Name	Function
(1) DVR Power LED 	Light when the unit is power on
(2) HDD LED 	Indicate the hard disk running state. Light when the HDD is running (Read/Write)
(3) IR Sensor	Receive signal from the remote control to operate the unit
(4) IR Sensor Port	To connect extended IR sensor cable
(5) USB Mouse Port	For USB mouse connection.
(6) USB 2.0 Port	Connect to pen drive / external hard disk for backup
 If the external hard disk is first time using, please format to FAT32 format.	
(6) 1/2/3/4/QUAD 	Use these buttons in playback mode to switch to display each channel in full screen or view all channels at the same time
 Channel 1  Channel 2  Channel 3  Channel 4  QUAD	
(7) Record 	Start video recording. To stop recording, press 
(8) Menu 	Call up and exit the OSD main and sub menu
(9) UP/DOWN/SELECT 	Use the UP and DOWN buttons to change setting and move to the left and right, and SELECT to enter or make a selection
(10) Playback/OSD Menu Control Buttons 	Use the buttons in playback mode to:
	Display the play list and play the recorded video
	Wind back the video playback at the speed of 2x, 4x, 8x or 16x
	Fast play the video playback at the speed of 2x, 4x, 8x or 16x
	Temporarily freeze the video playback
	Stop video playback

1.3 Back Panel

Name	Function
(1) LAN port	For Ethernet connection.
(2) CH1/CH2/CH3/CH4	Input the video camera signal and display it on channel 1/2/3/4
(3) TV Out	Output the video signal to other video output device through BNC port  When only connect one output device, please must set TV-VGA output order to MAIN-MAIN in <i>DISPLAY SETUP</i> (see also VGA-TV SELECTION in Chapter 3.1).
(4) VGA OUT	Output the video signal to a CRT or LCD monitor  When only connect one output device, please must set TV-VGA output order to MAIN-MAIN in <i>DISPLAY SETUP</i> (see also VGA-TV SELECTION in Chapter 3.1).
(5) Audio In/Out	For 4 * audio input (microphone) and 1 * output(speaker) device connection.  The audio input and output device has its own power supply is required.
(6) Sensor In	Support 4 sensor devices
(7) Alarm Out	Support 1 relay device (Relay: 1A @ 125V AC/30V DC)
(8) RS-485	For PTZ camera connection.
(9) FAN speed Switch	Adjust fan speed(High/Low) according to the actual environment situation  We do strong recommend that adjust the fan speed to High when the operating environment is over 40 °C.
(10)12V DC	Power cable connection

1.4 Setting Up the DVR Unit

1.4.1 Installing the Hard Disk

For hard disk spec, please referring to <http://www.vermedia.com/AVerDiGi/Product/> → **Embedded Analog DVR** → **AVerDiGi EB3004 NET** or **AVerDiGi EB3004 NET⁺** → **Hardware Recommendations**

The “compatible hard disks” indicated in the above recommendation list only means that these commercially available hard disks were tested with AVerMedia products and functioned well under normal operation conditions. AVerMedia does not guarantee or provide warranties, explicitly, implied or statutory with respect to the reliability of the hard disk function or its compatibility. In no event AVerMedia shall be liable for damages, with respect to any business interruption of clients, lost profits, loss of programs or other data on your information handling system or otherwise. This includes direct, indirect, incidental, special, or consequential damages, resulting from the incompatibility caused by the usage of these hard disks, even if AVerMedia has expressly advised about the risk of such damages. The entire risk arising out of the use of any information attached here with is borne by the recipient.

The DVR unit allows user to install one hard disk. Follow the illustrated instructions below to install the hard disk:

1. Loosen all screws

2. Push the cover backward and lift

3. Secure the brackets on the hard disk

4. Connect the the SATA cable and the power connector to the hard disk

5. Secure the hard disk inside the unit then place unit cover

6. Push the cover forward and secure the cover

7. You may now connect all the cables. When the power is connected, the Power LED light  turns on

1.4.2 Connecting Devices

The back panel of the DVR unit, user can connect up to 4 video cameras, 4 sensor devices, 1 alarm device and output video to a TV or CRT/LCD monitor. Also, the DVR unit supports 4 audio input devices and 1 audio output device. Using the bundled software enables user to playback and segment the video. Follow the illustration below to make the connection:

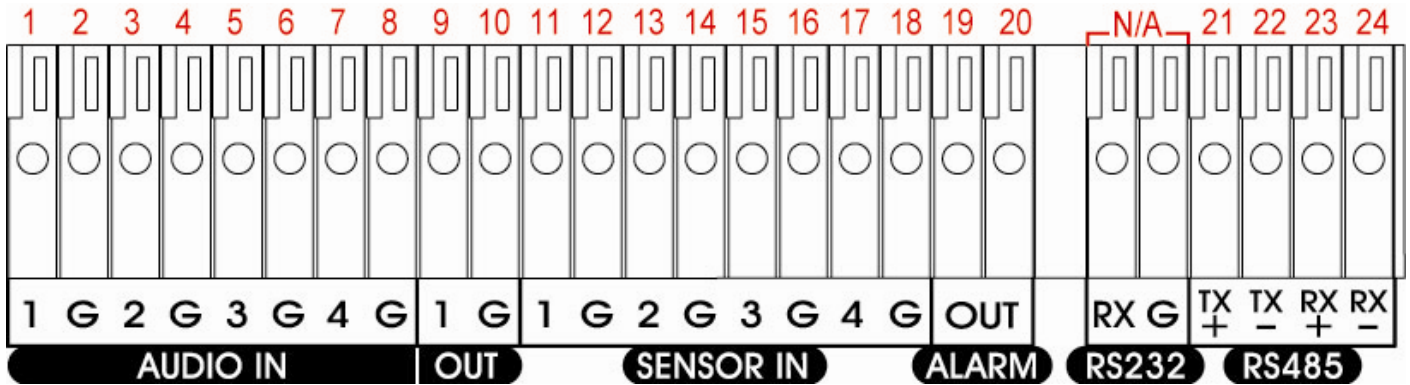

Each time you change the video display output or video system (NTSC/PAL), the power must be turned **off** and **on** to reset the DVR unit.

1.4.3 Connecting the Audio, Sensor and Relay device

The Sensor, Alarm, and audio port enable you to connect 4 sensor inputs, 1 relay outputs, 4 audio in devices and 1 audio out device. Just connect the external sensor, relay, and audio in/out device pin directly to the pinhole. The RS485 port can be used for PTZ camera connection.

Check the table below and locate which pinhole is assigned to audio in/out, sensor input, and relay output.

i The RS232 port is not supported at this version.

The signal from the sensor (i.e., infrared sensors, smoke detectors, proximity sensors, door sensors, etc.) is being transmitted to the unit and this triggers the system to respond and send signal to relay device (i.e., alarm, telephone etc).

Audio in and out pinhole:

Pin #	Definition
1	Audio input signal
2	Audio Ground signal
3	Audio input signal
4	Audio Ground signal
5	Audio input signal
6	Audio Ground signal
7	Audio input signal
8	Audio Ground signal
9	Audio output signal
10	Audio Ground signal

Sensor in and Alarm pinhole:

Pin #	Definition
11	Sensor 1 signal
12	Sensor 1 Ground signal
13	Sensor 2 signal
14	Sensor 2 Ground signal
15	Sensor 3 signal
16	Sensor 3 Ground signal
17	Sensor 4 signal
18	Sensor 4 Ground signal
19	Relay signal
20	Relay signal

RS-485 Pin Definition

When connect PTZ camera through RS485 interface, please refer to the following pin definition to connect the DVR and PTZ.

	Pin #	DVR site	PTZ site
21	TX+	RS485 TX+ signal	RS485 RX+ signal
22	TX-	RS485 TX- signal	RS485 RX- signal
23	RX+	RS485 RX+ signal	RS485 TX+ signal
24	RX-	RS485 RX- signal	RS485 TX- signal

 If user uses the 2 wires for the PTZ camera connection, please connect to the RS-485 TX+ and TX- of the DVR site.

2.1 Familiarizing the Remote Control Buttons

Use the Remote control to operate the OSD menu on surveillance screen.

Button	Function
(1)	<ul style="list-style-type: none"> - Press FN + 0, the DVR system will instantly playback the recorded file that is recorded 60 seconds before. - In multiple DVR mode, Press FN + number button (1 ~ 9) can switch to the selected DVR.
(2)	<ul style="list-style-type: none"> As a Channel 1 in preview and playback mode As a channel 1 and preset position in PTZ mode
(3)	<ul style="list-style-type: none"> As a Channel 2 in preview and playback mode As a channel 3 and preset position in PTZ mode
(4)	<ul style="list-style-type: none"> As a Channel 3 in preview and playback mode As a preset position in PTZ mode
(5)	<ul style="list-style-type: none"> As a Channel 4 in preview and playback mode As a preset position in PTZ mode
(6)	<ul style="list-style-type: none"> Switch to QUAD mode in preview and playback mode As a preset position in PTZ mode
(7)	<ul style="list-style-type: none"> As a channel 2 in PTZ mode As a preset position in PTZ mode
(7)	<ul style="list-style-type: none"> As a channel 4 in PTZ mode As a preset position in PTZ mode
(7)	<ul style="list-style-type: none"> As a preset position in PTZ mode
(7)	<ul style="list-style-type: none"> As a preset position in PTZ mode
(8)	<ul style="list-style-type: none"> To enter the OSD Main menu Exit from the main menu or sub-menu display

Button	Function
(9)	To move up the selection and select the items in the menu list or change the settings.
(10)	<ul style="list-style-type: none"> Make a selection To play the video Enter sub-menu
(11)	To move the selection to the left
(12)	To move the selection to the right
(13)	To move down the selection and select the items in the menu list or change the settings.
(14)	Start video recording
(15)	To backup the vido segment to external flash memory (See 2.1.2).

Button	Function
(16)	 Set a playing recorded video from A point to B point segment and repeat playing on surveillance screen(See 2.1.1)
(17)	 Fast play the video playback at the speed of 2x, 4x, 8x ,16x, 32x, or 64x When  button has pressed, and press  can go to next frame
	 To start play recorded file / To enter playback menu
	 Rewide the video playback at the speed of 2x, 4x, 8x ,16x, 32x, or 64x When  button has pressed, and press  can go back to last frame
	 Pause the playing
(18)	<small>ZOOM+</small>  To zoom in view of PTZ camera
	<small>ZOOM-</small>  To zoom out view of PTZ camera
(19)	 PTZ camera control button. Press  + camera channel button(   )can enter PTZ mode to control PTZ camera.(see Chapter 2.1.3)
(20)	<small>SPEED+</small>  To speed up movement of PTZ camera lens
	<small>SPEED-</small>  To speed down movement of PTZ camera lens
(21)	<small>FOCUS+</small>  To focus in PTZ camera lens
	<small>FOCUS-</small>  To focus out PTZ camera lens
(22)	 Stop playing / Stop recording

2.1.1 Using AB Repeat Function

AB Repeat function allow user to set a video segment from A to B point and play on the surveillance screen until user stop.

1. Press  to call out the **SEARCH MODE** menu to find the recorded video that user wants to playback.
2. Select **TIME SEARCH**, **FILE LIST**, or **MOTION SEARCH**.
 - **TIME SEARCH** (search by date and time): select the date and time from where you want to begin the video playback.
 - **FILE LIST**: select from the file list.
 - **MOTION SEARCH** (search by motion area): select an area to do the motion search.
3. During the playback, press  to set the A point of video segment. And then, press  again to set the B point of video segment. On the surveillance screen will display “A-B” and repeat playing the AB point video segment which user has set. To cancel AB repeat, press  again.

2.1.2 Using USB Backup Button

User can press  button to backup the AB segment video file.

VIDEO BACKUP SETUP	
START	2009 / 11 / 03 14 : 50 : 10
END	2009 / 11 / 03 14 : 52 : 10
BACKUP CH	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/> 4
BACKUP SIZE	~4 MB
BACKUP	

1. Plug in pen drive or external hard disk to DVR system.
2. Set the AB segment video (see [Chapter 2.1.1](#)).
3. During the AB segment video playback, press  button.
4. Select the **START** time of backup time by pressing the  button, using  and  to setup the date and time. To confirm the value or selection, press .
5. Select the **END** to set the end of backup time. Press  and use  and  to setup the date and time. To confirm the value or selection, press .
6. Select the **BACKUP CH** to setup the channel that user wants to backup. Press  and use  and  to select the channel.
7. Select the **BACKUP SIZE** to calculate the total size of backup file.
8. Select the **BACKUP** and press  to start backup.
9. When backup confirm message appear, press  (YES) to start backup file or press  (NO) to exit backup mode.

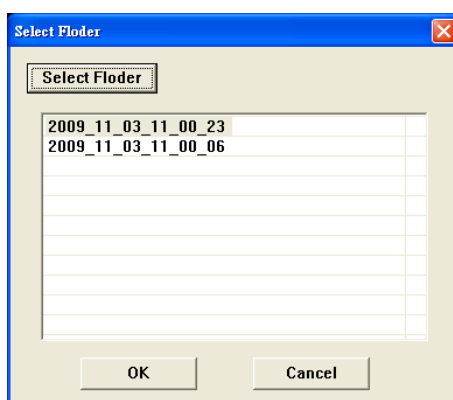

If the external hard disk is first time using, please format to FAT32 format.

2.1.2.1 To Playback the AVF Format File

After recorder file back to external flash memory, user can playback the backup file by AVF Player that contains in backup folder when backup.

1. Double click the **AVF Player.exe**  to run the application.
2. Click **Open File** button from AVF Player UI.
3. Click **Select File** to locate the backup file and select the file to playback. Click **OK** to start playback.

4. The selected file will be playback on AVF Player UI.

2.1.3 Controlling PTZ Camera

Using remote control, user can easily control PTZ camera at local site. Before starting, make sure the PTZ camera is connected with the DVR unit and PTZ function is enabled(see also [PTZ Setup of Chapter 3.1](#)).

2.1.3.1 To Enter the PTZ Mode

To control PTZ camera, user need to enter the PTZ mode first. Press **PTZ** button, and camera channel number button (**1** **2** **3** **4**). The surveillance monitor will switch to single screen PTZ mode.

Speed for PTZ Camera movement.
Using **SPEED-** and **SPEED+** button to adjust the speed.

To exit PTZ mode, press **BOOK** button. Also, when the DVR system is idle over 1 minute, the DVR system will automatically exit PTZ mode.

2.1.3.2 To Set Preset Position

User can set 9 preset positions for PTZ camera. Using **1** to **9** button to set the preset position.

1. Press **PTZ** and camera channel number button (**1** **2** **3** **4**) to enter PTZ mode.
2. Using **▲**, **▼**, **◀** and **▶** to adjust the lens of the PTZ camera to the position that user wants.
3. Press any number button over 3 seconds and the position will be saved.
4. To move the PTZ camera to preset position, just press the number button.

2.1.3.3 Controlling the PTZ Camera

To move, adjust focus, and zoom in/out camera lens can be done by using some function buttons on the remote control.

-  To move the PTZ camera lens to the right
-  To move the PTZ camera lens to the left
-  To move the PTZ camera lens to go up
-  To move the PTZ camera lens to go down
-  To zoom in PTZ camera
-  To zoom out PTZ camera
-  To speed down movement of PTZ camera lens
-  To speed up movement of PTZ camera lens
-  To focus in PTZ camera lens
-  To focus out PTZ camera lens

2.2 Using the DVR for the First Time

1. Make sure all devices and power cables are well connected.
2. Turn on the DVR unit by connecting the power cable into the power plug.
3. User should see the **SYSTEM INITIALIZE** window appear on the surveillance screen. The system will do hard disk detection automatically.
4. For the first time use hard disk, please format the hard disk. Select **HDD FORMAT** and press  (**YES**) to format hard disk. If hard disk doesn't need to format, press  (**NO**).
5. When is done, **HDD FORMAT** will show **COMPLETE**.

SYSTEM INITIALIZE	
FW VERSION	B3.01.01.00.01
HDD STATUS	WAIT . . .
HDD SIZE	476.918MB
HDD FORMAT	YES(SELECT) NO(MENU)

SYSTEM INITIALIZE	
FW VERSION	B3.01.01.00.01
HDD STATUS	WAIT . . .
HDD SIZE	476.918MB
HDD FORMAT	COMPLETE

6. When hard disk format is done, please adjust the system date and time in order to have the correct recording date and time.
7. Press  to call up the OSD menu, and then, use  and  to select **SYSTEM** → **DATE/TIME** and press  to make a selection.
8. Press  and use  and  to select the **DATE FORMAT**.
9. And then, adjust the **DATE** and **TIME** by using  to make a selection and using  and  to adjust the date and time.

DATE / TIME SETUP	
DATE FORMAT	YYYY/MM/DD
DATE	2009 / 11 / 03
TIME	15 : 19 : 09
TIME SYNC	<input type="checkbox"/>
FORCE SYNC	<input type="radio"/>
TIME ZONE	GMT +08 : 00
LAST SYNC TIME	2009 / 01 / 01 00 : 00 : 00
DAYLIGHT SAVING	<input type="checkbox"/>
START	2009 / 01 / 01 00 : 00 : 00
END	2009 / 01 / 01 00 : 00 : 00
OFFSET	00 : 00

10. When is done, the DVR system is ready to record.

2.3 Surveillance Screen Introduction

This chapter will describe the symbols on the surveillance screen and screen display mode. While DVR is playback, the record action will keep working and the surveillance screen is playback the recorded video.

Surveillance Screen

■ Preview Mode

Symbol	Description
	DVR is recording
	Audio is enabled
	Speaker is available
	Motion Detection
 5%	Hard disk capacity
	Hard disk overwrite is enabled
	Network is connected

■ Playback Mode

Symbol	Description
	Playback the recorded video
	Go back to the last frame button is pressed
	Go to next frame button is pressed
	The pause the playing button is pressed
	Audio is enabled
A-B	AB segment is set and playing
	Recorded video is playback at backward speed(2x, 4x, 8x, 16x, 32x, or 64x)
	Recorded video is playback at faster forward speed(2x, 4x, 8x, 16x, 32x, or 64x)
A	Always Recording
B	Button Recording
L	Alarm Recording

■ Screen Display Mode

User can switch to display each channel in full screen or 4 channels in **D1**, **D1 ENHANCE**, or **CIF** record mode.

Full Screen Mode

QUAD Screen Mode

When you are in full screen preview, press the following buttons on the remote control and control panel to switch to different channel, or preview all 4 channels:

CH1: Camera 1

CH2: Camera 2

CH3: Camera 3

CH4: Camera 4

QUAD:4-Channel

2.3.1 Setup the Time Stamp

By enabling **TIME STAMP** function, current date and time will be displayed on each channel screen to verify the recording date and time. Please follow the below steps to enable **TIME STAMP**.

1. Press  to call out OSD menu.
2. Using  and  to move the highlight to **CAMERA/RECORD** and press  to make a selection.
3. Select **GENERAL** and press  to make a selection.
4. And then, select **TIME STAMP** by pressing  button.
5. Using  and  to select the disable/enable of TIME STAMP and press  or  to confirm.

GENERAL SETUP	
RECORD MODE	CIF
DVR NAME	COMPANY
TIME STAMP	<input checked="" type="checkbox"/>
WATERMARK	<input type="checkbox"/>
AUTO RECORD	<input checked="" type="checkbox"/>
PRE RECORD	00 SEC

6. Press  to exit from OSD menu.
7. The current date and time will display on upper right corner of each channel screen and will be recorded.

2.3.2 Playback the Video

If the unit is recording the video, user don't have to stop video recording.

1. Press  (play).
2. Use the  and  buttons to go up and down and select **TIME SEARCH**, **FILE LIST**, or **SMART MOTION SEARCH**. And then, press  to make a selection.

SEARCH METHOD	
TIME SEARCH	
FILE LIST	
SMART MOTION SEARCH	

TIME SEARCH (search by date and time):

1. In **TIME SEARCH** window, the **START TIME** and **END TIME** show the date and time from when the recording begins and ends.
2. Press  and use the  and  buttons to set the **SEARCH TIME**.
3. After **SEARCH TIME** has set, select **SEARCH EXECUTION** and press  to start searching.
4. When the playback file is found, the DVR system will start playback automatically.

TIME SEARCH	
START	TIME: 2009 / 01 / 09 11:36:21
END	TIME: 2009 / 01 / 09 11:36:21
SEARCH TIME	: 2009 / 01 / 09 11:36:21
SEARCH EXECUTION	

FILE LIST (search by condition):

1. In **FILE LIST** window, press  and use  and  buttons to set the date and time for searching. And then, select the **EXECUTION** to start searching.
2. The searching result will be list out. Using  and  buttons to go up and down and press  to make a selection.
3. After make a selection, the **FILE LIST** of each channel will list out. Use  and  buttons to the selection and press  to make a selection.
4. The selected event will start to playback.

SEARCH AREA	
SEARCH EXECUTION	

4. And then, select **SEARCH AREA** to mark an area to search. Use the , , , and  to move the block and press  or  to confirm. To exit, press .
5. To start searching, select the **SEARCH EXECUTION**.
6. After make a selection, the DVR system will start playback automatically.

SEARCH AREA SETUP SCREEN

Listed below are the symbols of recording condition that will display on surveillance screen while playback mode and record mode:

A – Always Recording

It records non-stop and automatically continue recording when interrupted.

L – Alarm Recording

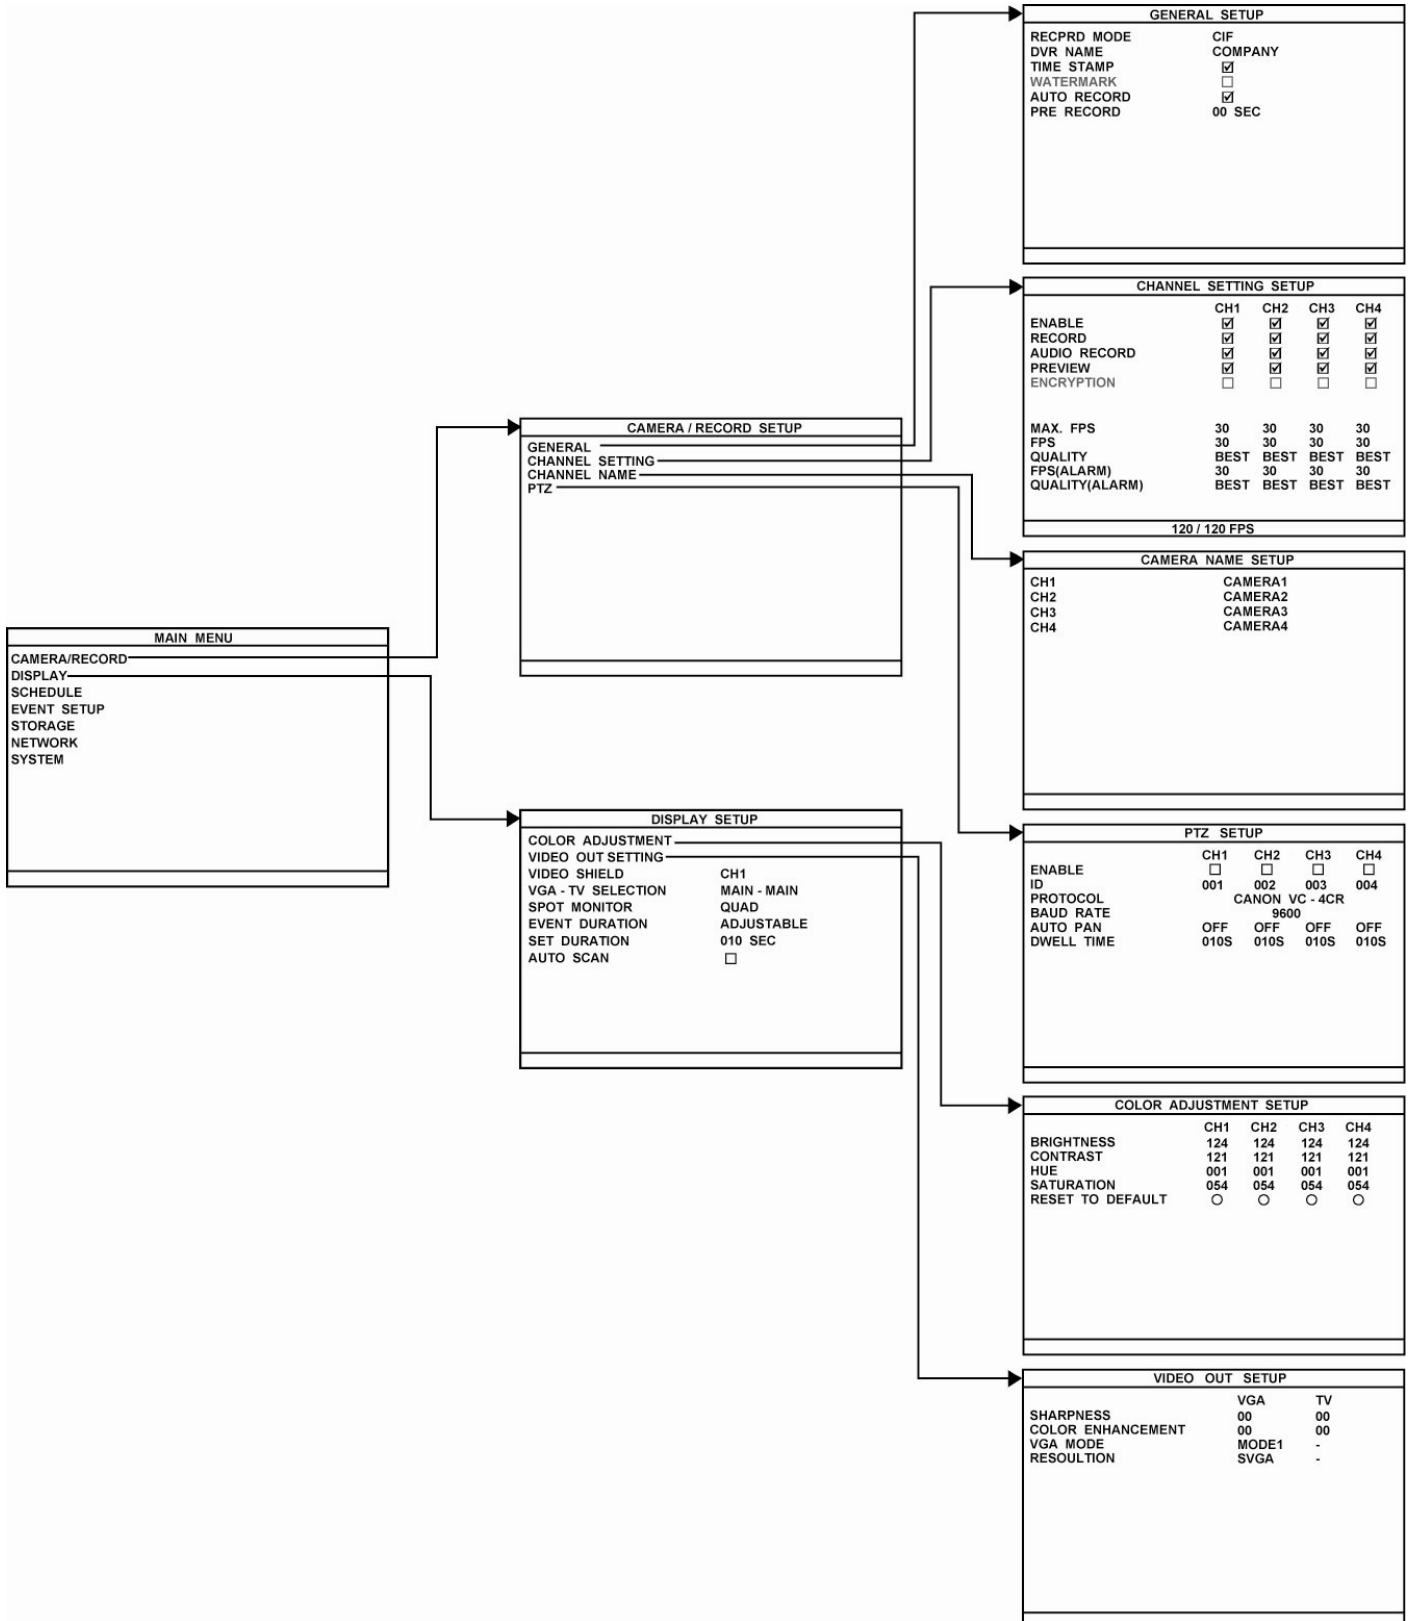

It records when the alarm has activated.

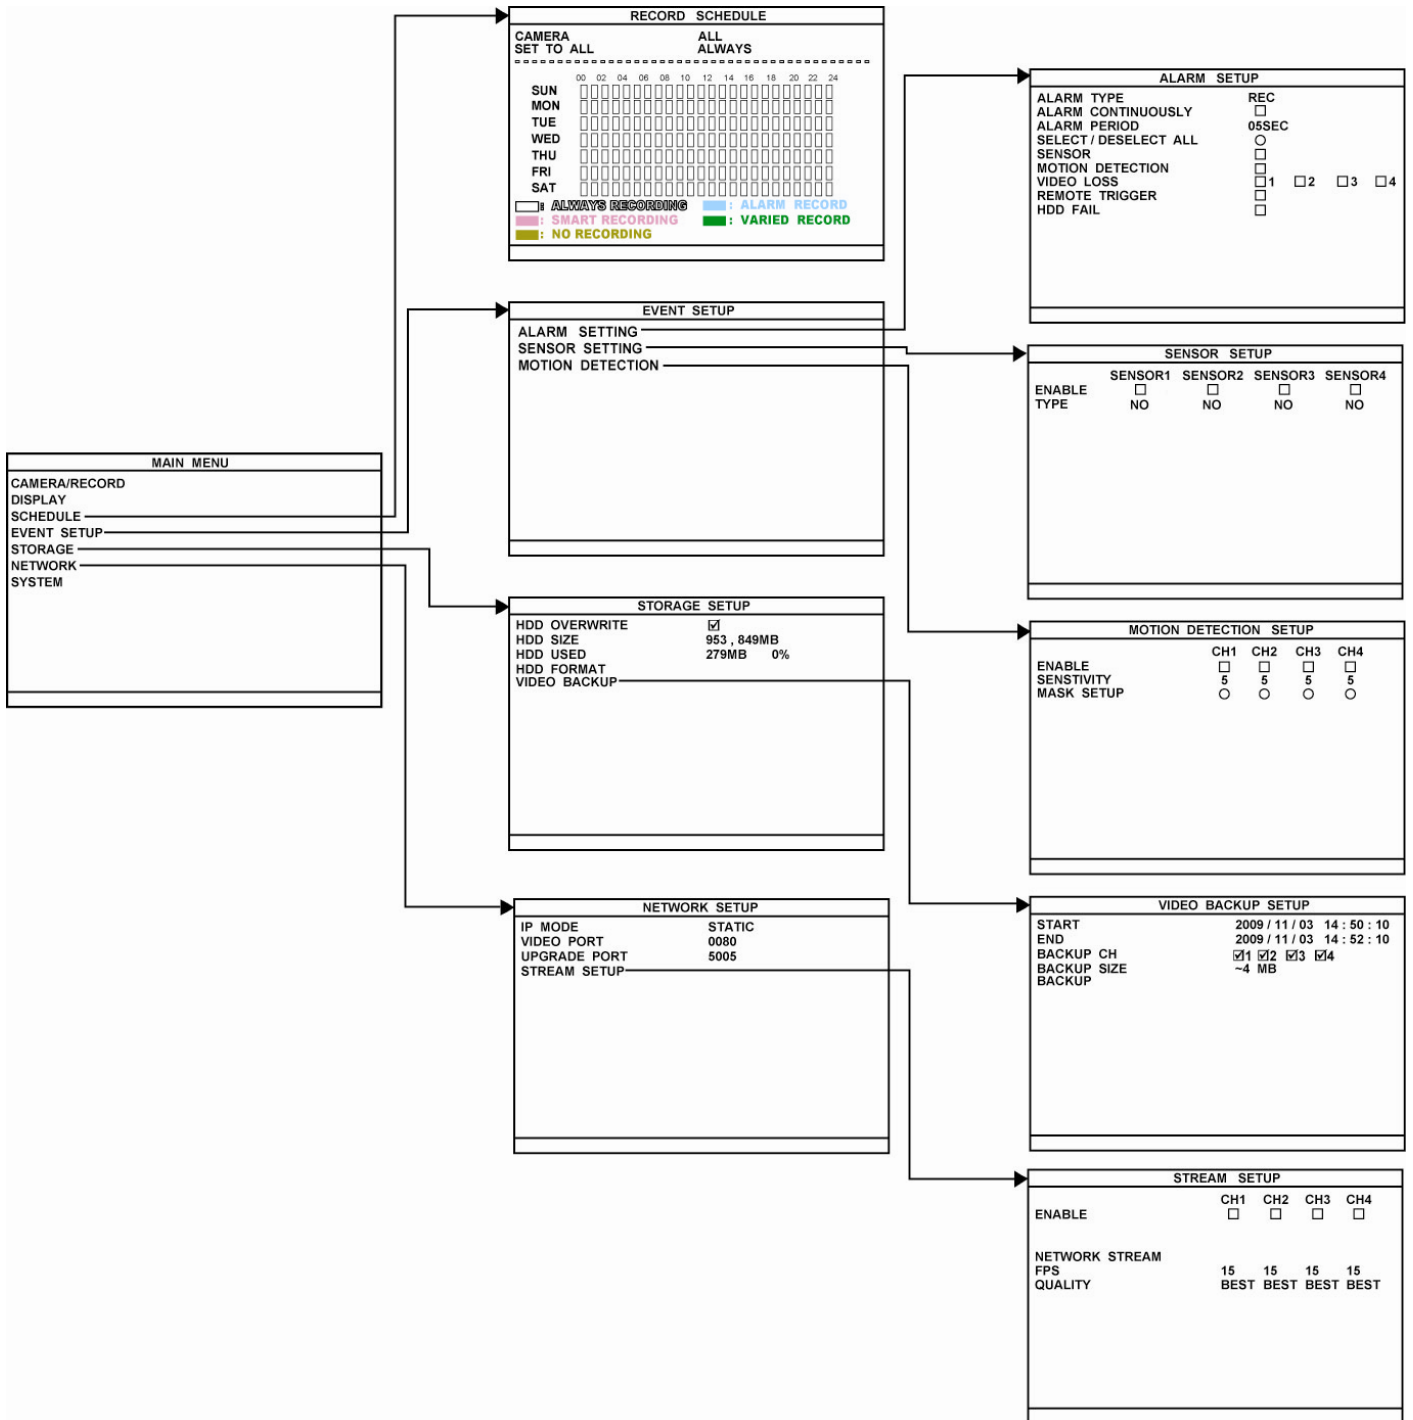

B – Button Recording

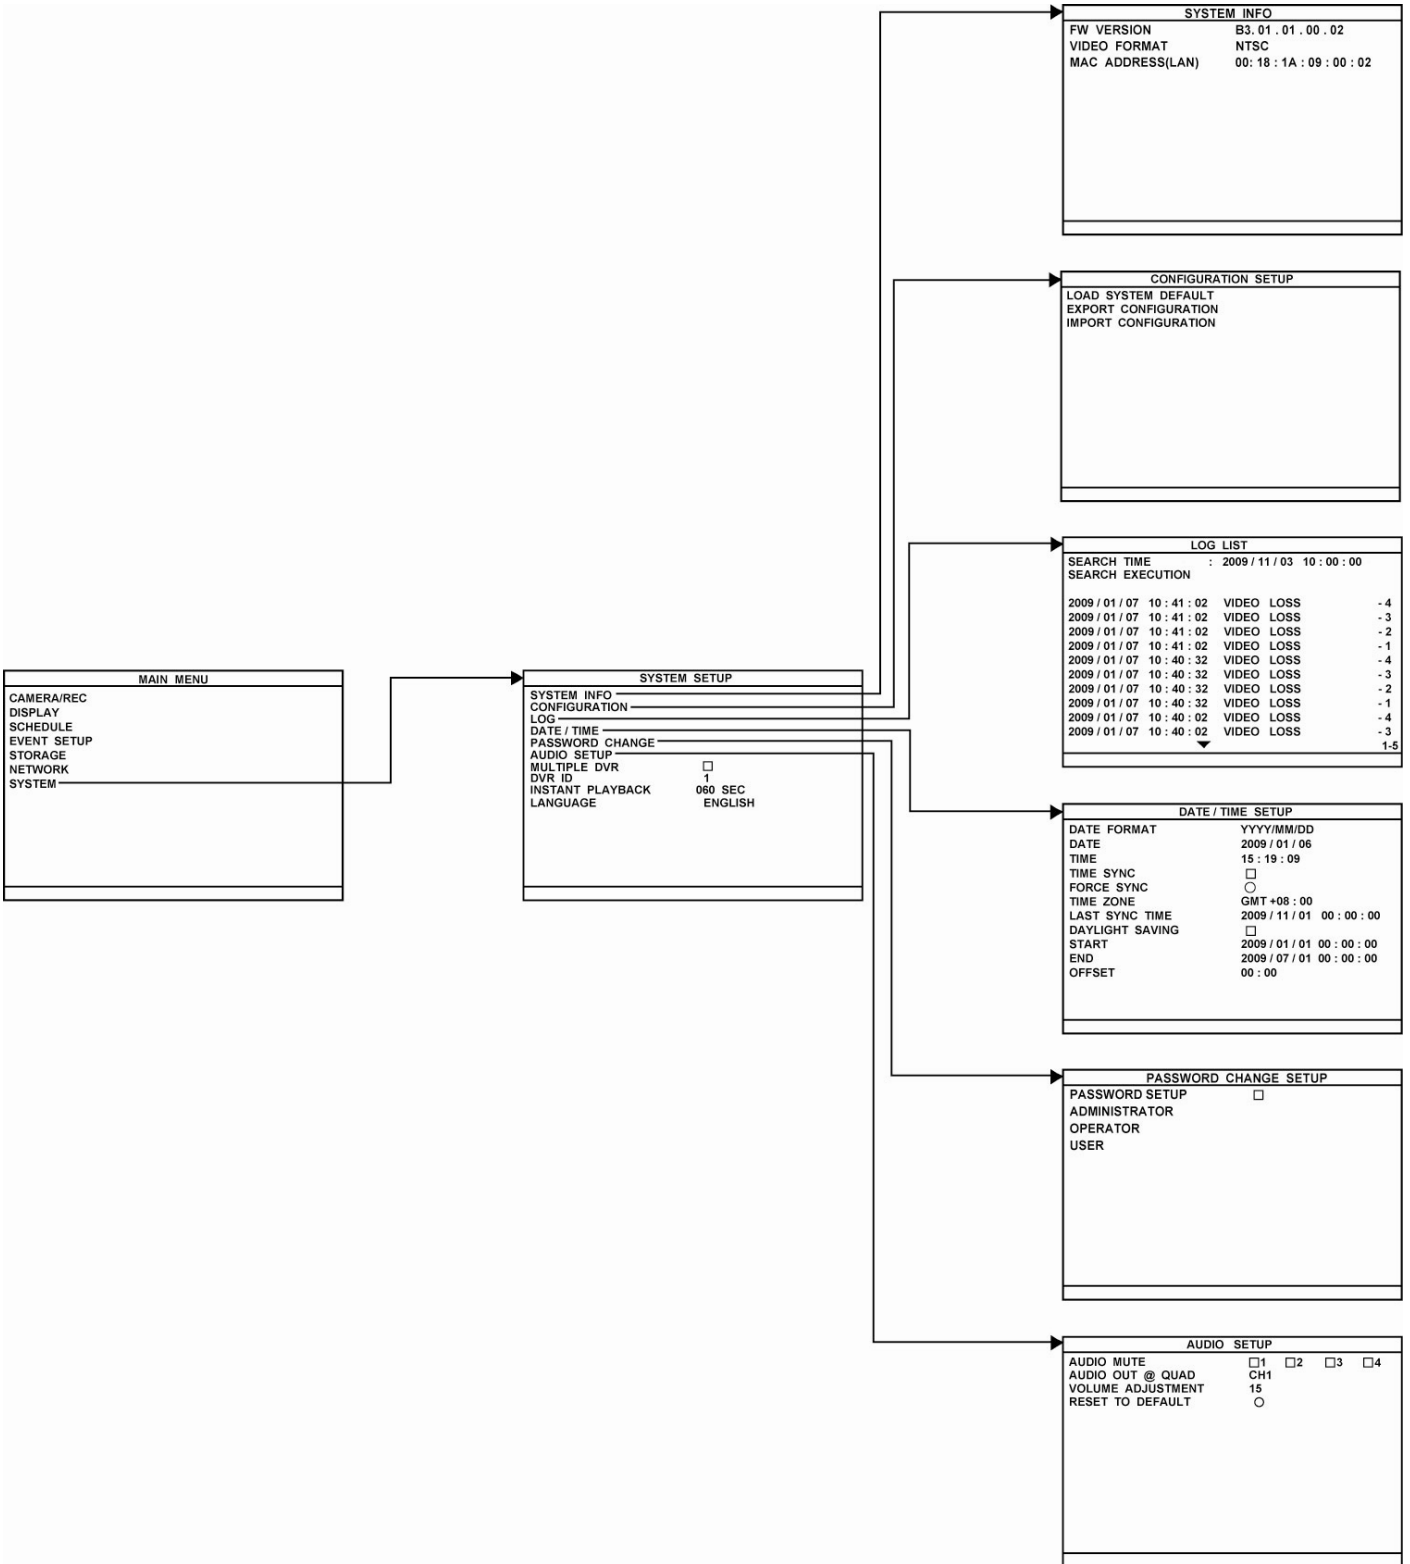

It records when the  record button is pressed.

The “▶” play symbol would appear beside the channel number when you are in playback mode.

The following figure is an OSD menu tree map. To call out the OSD menu, press  on the remote control.

3.1 Menu Function

Use remote control to navigate in the OSD menu. The red frame turns yellow when you are making a selection.

Each time you change the video display output or video system (NTSC/PAL), the power must be turned **off** and **on** to reset the DVR unit.

120 120 FPS

Current total fps value that user has set

Total fps value that user can set

CHANNEL SETTING

Configure the parameters of each channel.

ENABLE

Enable/disable the channel to display the video on the surveillance screen. If the channel is disabled, there won't be any video display and recording.

RECORD

Enable/disable the channel number to record video.

The channels are enabled in the **ENABLE** can be set for video recording.

AUDIO RECORD

Enable/disable audio recording. To record sound, make sure the audio input device (ex: microphone) is connected to the DVR unit.

PREVIEW

Enable/disable the video preview on the surveillance screen.

MAX. FPS

Display the maximum frame rate of recording that user has set. Maximum fps total value depends on the RESOLUTION that user has chosen.

FPS

Set the number of frames per second to be recorded. The higher the frame rate, it uses more hard disk space.

QUALITY

Select the video quality setting from BEST, HIGH, GOOD, MEDIUM, NORMAL or LOW. Choosing higher quality allows user to record less hours but the quality of the recorded video is better.

FPS(ALARM)

Set the number of frames per second to be recorded when alarm has occurred. The higher the frame rate, it uses more hard disk space.

QUALITY(ALARM)

Select the video quality (BEST, HIGH, GOOD, MEDIUM, NORMAL or LOW) of alarm recording. Choosing higher quality allows user to record less hours but the quality of the recorded video is better.

CAMERA NAME SETUP	
CH1	CAMERA1
CH2	CAMERA2
CH3	CAMERA3
CH4	CAMERA4

CHANNEL NAME

Give a name of the channel 1 ~ 4. Maximum is 12 characters and may contain A~Z, 0~9, !, ", #, \$, %, &, ', (,), *, +, -, /, :, ;, <, >, ?, @, and space.

PTZ SETUP

ID	001	002	003	004
PROTOCOL	PELCO-D			
BAUD RATE	9600			
AUTO PAN	OFF	OFF	OFF	OFF
DWELL TIME	010S	010S	010S	010S

PTZ SETUP

To enable PTZ camera control by remote control and setup PTZ camera parameters.

ENABLE

Select the channel of PTZ camera. If the PTZ camera is connecting on channel 1, then select the camera 1 for PTZ video to be display on channel 1.

ID

Assign an ID to PTZ camera. The ID range is from 000 to 255 but is limiting by protocol of PTZ camera. Please refer to your PTZ camera user's manual for more detail of PTZ ID assignment.

We suggest assigning PTZ camera ID starting from 5 to avoid conflict with ID of camera channels.

PROTOCOL

Select the protocol of PTZ camera. The protocol will be different that depends on the brand of PTZ camera. The DVR system currently supports 3 protocols — PELCO-D, PELCO-P, and CANON VC-C4R. Please refer to your PTZ camera user manual to make sure which protocol is using for.

BAUD RATE

To setup the baud rate of PTZ camera. For more detail, please refer to your PTZ camera's user manual.

AUTO PAN

Select the preset number to assign an auto move direction for the PTZ camera. For example: 1-4 means the PTZ camera will auto move from preset position 1, 2, 3 to 4 repeatly.

DWELL TIME

Set a time that how long the PTZ camera stays in that position before it moves to the next one.

RECORD SCHEDULE

By default, in 24 hours, the recording schedule is set to always record every hour. Refer to the table below to customize the recording condition.

Condition	Description
NO RECORD	Not recording at all.
ALWAYS	Record non-stop.
SMART	Automatically switch to recorded at the frame rate of FPS (alarm) that is setup in CAMERA CHANNEL SETTING once an alarm is detected and if there is no motion, it records at the frame rate of FPS that is setup in CAMERA CHANNEL SETTING .
ALARM	Start recording when the alarm is activated.
VARIED	When each channel has different recording schedule, the schedule table will display as Green color (VARIED RECORD).

CAMERA

Select a channel (1, 2, 3, or 4) or **ALL** for record schedule setup.

SET TO ALL

Select a recording condition – **NO RECORD**, **ALWAYS**, **SMART** or **ALARM**. Please refer to the above table for record condition description.

NETWORK SETUP

Setup the network parameters for the internet or intranet remote monitor or playback.

NETWORK SETUP	
IP MODE	STATIC
VIDEO PORT	0080
UPGRADE PORT	5005
STREAM SETUP	

IP MODE

The system provides 3 types of IP setup mode – STATIC, DHCP, and PPPOE.

- **STATIC:** Assigns a constant IP address for the DVR system.
 - **IP ADDRESS:** Assign a constant IP address which a real IP addresses give from ISP to DVR system.
 - **SUBNET:** It is a bitmask used to identify the sub network and how many bits provide room for host addresses. Enter the subnet mask of the IP address which user has assigned to DVR system.
 - **GATEWAY:** A network device act as a passageway to internet. Enter the network gateway IP address
 - **DNS:** Domain Name Server translates domain names (such as www.abb.com.tw) to IP addresses. Enter the IP address of DNS if it is available.
 - **MAC ADDRESS:** The hardware address of the DVR system. Only for information. Doesn't need to enter the MAC address.
 - When all parameters are set, select the **CHANGE** to confirm the configuration.

NETWORK INFORMATION	
IP ADDRESS	192.168.1.3
SUBNET	255.255.255.0
GETWAY	192.168.1.254
MAC ADDRESS	00.00.00.00.00.00
CHAGNE	

- **DHCP:** Assign the IP address by local DHCP server to DVR system.

The DHCP (Dynamic Host Configuration Protocol) is a set of rules used by a communications device (such as a computer, router or networking adaptor) to allow the device to request and get an Internet address from a server which has a list of addresses available for assignment

- **PPPOE:** Point-to-Point Protocol over Ethernet is a network protocol for encapsulating PPP frames in Ethernet frames. It is used mainly with ADSL services. If your network is using ADSL service connecting to internet, and then, select PPPOE mode.

VIDEO PORT

A port for the remote connection. Any port can be assigned as a video port, except the ports already used by the network services. The default video port is 80.

NETWORK SETUP	
IP MODE	STATIC
VIDEO PORT	0080
UPGRADE PORT	5005
STREAM SETUP	

UPGRADE PORT:

A port for the remote update DVR system firmware. Any port can be assigned as an upgrade port, except the ports are already used by the network services. The default upgrade port is 5005.

Please **DO NOT** cut off the power of the DVR system while the firmware is upgrading. Power failure will cause the permanent damage of the DVR system.

Set whole system back to factory default. Please restart DVR after default value has loaded.

EXPORT CONFIGURATION:

Backup the current DVR system setting to USB storage device such as pen drive or external hard disk. Plug in the USB storage device before starting to save the configuration.

IMPORT CONFIGURATION:

To restore the previous saved DVR system setting from USB storage device such pen drive or external hard disk. Please restart DVR after default value has loaded.

LOG SETUP

To search event log. Select the **SEARCH TIME** and select **SEARCH EXECUTION** to start searching. The search result will be list out. User can select the log to view.

DATE

Set the current date

TIME

Set the current time Display the latest time synchronization date and time.

TIME SYNC

Enable/disable time synchronization automatically through network. The DVR system will auto synchronize time from NTP servers.

FORCE SYNC

To synchronization system time through the network time server manually.

TIME ZONE

Select the time synchronization time zone. The time zone will base on GMT (Greenwich Mean Time) time zone.

DAYLIGHT SAVING

To enable/disable daylight saving function.

START

Setup daylight startup date and time.

END

Setup daylight stop date and time.

OFFSET

Assign a time that it is for daylight saving time offset in your time zone. For example: if the time zone is in U.S. Eastern, the time offset is 1 hour.

MULTIPLE DVR

Enable/disable multiple DVR system remote control. When user has more than one DVR system, user can use **MULTIPLE DVR** function to control all DVR system by single remote control.

- Using remote control to enter the DVR ID and switch to the selected DVR. To enter the DVR ID, please press **FN** + number button(**1** ~ **9**) can switch to the selected DVR.
- When idle time is over 1 minutes, user need to re-enter the DVR ID in order to controll the selected DVR.

DVR ID

Assign an ID of the DVR system for multiple DVR controlling. When multiple controlling, use remote control to press the DVR ID (**FN** + number button(**1** ~ **9**)) can switch to operate the DVR system.

INSTANT PLAYBACK

To set the time in seconds for automatically playback the video that has just recorded.

LANGUAGE

Select the language of the system

4.1 Recommended System Requirements

- Pentium®4 2.4GHZ or above
- Windows®2000/ Windows XP/Windows Vista/Windows 7
- DDR 256 MB
- Graphic function must support DirectDraw
- Audio card or built-in
- Speaker
- 1 available USB2.0 port

4.2 Installing the USB Playback Console

To install the USB Playback Console:

1. Place Installation CD into the CD-ROM drive. When the installation main screen appears, click **Install USB Playback Console** and then follow the on screen instructions

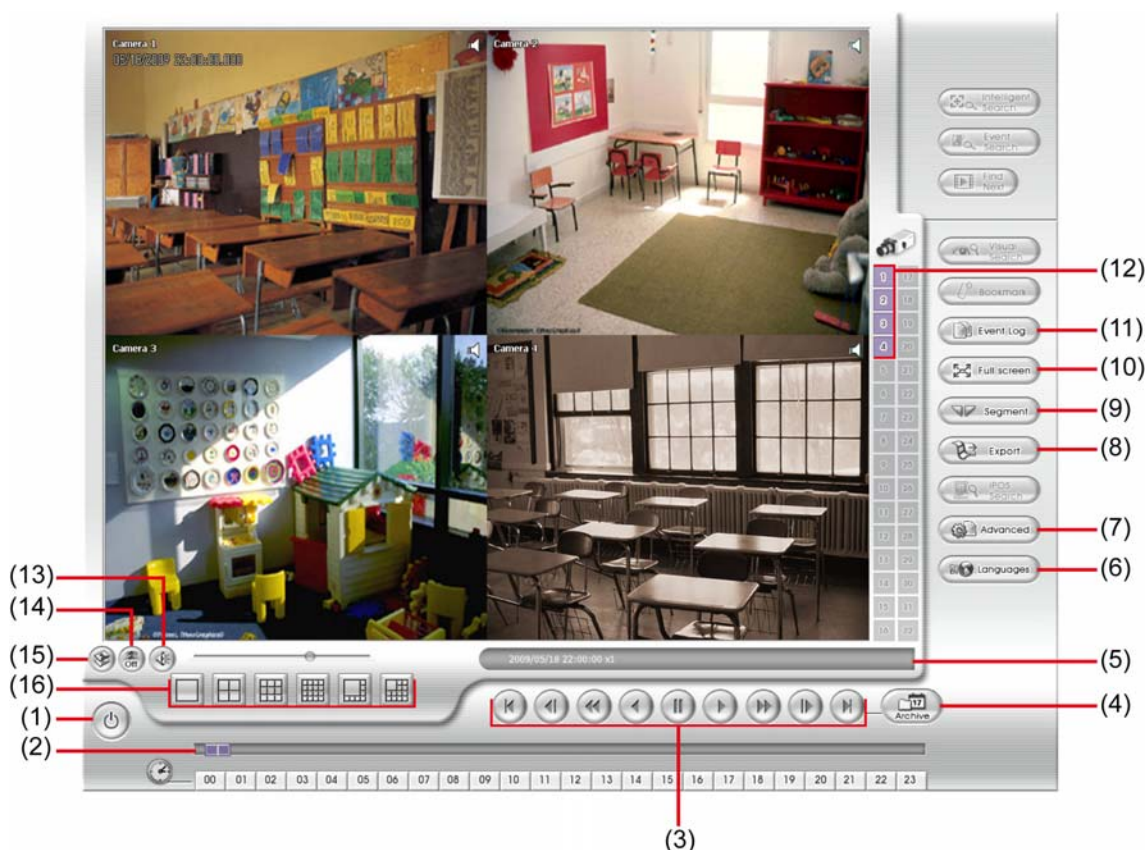

2. Select the language you prefer

3. Click **OK** to install the application
4. Click **Exit** to close the installation main screen.
5. You may now connect the external USB enclosure that contains recorded file hard disk to the PC.

4.3 Running the USB Playback Console

To run the application, click the  icon on the PC desktop

Name	Function
(1) Exit	To close the application.
(2) Progress bar	Show the progress of the file being played. You may move the bar to seek at any location of the track.
(3) Playback Controller	<p> Begin: Move at the beginning of the recorded video file.</p> <p> Previous: Go back to the previous frame by frame.</p> <p> Slower</p> <ul style="list-style-type: none"> - Play the backup recorded video file (*.dvr) at the speed of 1/2x, 1/4x, 1/8x, 1/16x, or 1/32x. - Play the record video file (*.avf) at speed of 1/2x, 1/4x, 1/8x, or 1/16x. - Play the record video file from hard disk directly at speed of 1/2x, 1/4x, or 1/8x. <p> Rewind: Wind back the recorded video file.</p> <p> Pause: Briefly stop playing the recorded video file.</p> <p> Play: Play the recorded video file.</p> <p> Faster</p> <ul style="list-style-type: none"> - Play the recorded video file (*.dvr and *.avf) at the speed of 2x, 4x, 8x, 16x, or 32x. - Play the recorded video file from hard disk directly at speed of 2x, 4x, 8x, or 16x. <p> Next: Go to the next frame by frame.</p> <p> End: Go to the end of the recorded video file.</p>

Name	Function
------	----------

(4) Open File To select the video file source for playing.

- **DVR Recorded File (HD):** To playback the recorded video from the hard disk which was recording video on the DVR system. (see also [Chapter 4.3.2](#))
- **Backup File(.dvr):** The file is backup and save in *.dvr file format. (see also [Chapter 4.3.3](#))
- **Backup File (.avf):** The file is backup and save to external USB storage device in *.avf format. To playback avf format file, see [Chapter 2.1.2.1](#).

(5) Status bar Display the recorded date, time and play speed.

(6) Language To switch language of function tips.

(7) Advanced Advanced function is including :

- **HDD Backup:** to call out HDD Backup application. (see also [Chapter 5](#))
- **iEnhance:** to call out iEnhance application. (see also [Chapter 6](#))
- **AVF to AVI:** save *.avf file format into *.avi file format.

(8) Export Export includes Snapshot, Print, Output Video Clip, and Export KML function.

- **Snapshot:** Capture and save the screen shot either in *.jpg or *.bmp format.
- **Print:** Print the screen shot.
- **Output to AVI:** Save the segmented file in *.avi format

(9) Segment Keep a portion of the recorded video (see also [Chapter 4.3.1](#))

(10) Full screen Use the entire area of the screen to only display the video. To return, press the right button of the mouse or **ESC** on the keyboard.

When you switch to full screen in multiple-screen mode, Left click to toggle to only display one of the video in the multiple-screen mode or all.

(11) Event List Select the event you want to playback. The event list only available when user select to playback in **DVR Recorded File(HD)**.

(12) Camera ID Show the number of cameras that are being viewed. When you are in single screen mode, click the camera ID number to switch and view other camera.

(13) Sound /Sound bar

- Turn on and off the sound
- Increase and decrease the volume

(14) De-interlace To enhance the video quality. Set the de-interlace mode to #1, if you are capturing motionless picture and #2, if it captures lots of movement.

Name	Function
(15) Watermark	When playback file from hard disk and *.avf file, click watermark to call out ImageVerification application (see also Chapter 7).
(16) Split Screen Mode	Select from different screen view to playback the recorded video file of the entire camera or one camera on screen.

4.3.1 To Cut and Save the Portion of the Recorded Video

1. Use the Playback Control buttons or drag the bar on the playback progress bar and pause on where you want to start the cut. Then, click **Segment** to set the begin mark.

2. Use the Playback Control buttons or drag the bar on the playback progress bar and pause on where you want to end the cut. Then, click **Segment** to set the end mark. To cancel segmentation, click **Segment** button again.

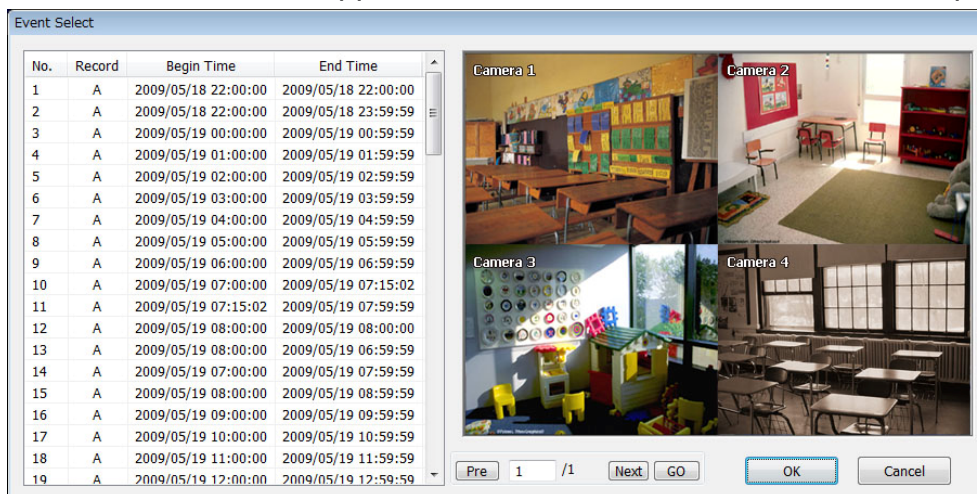

3. Click **Output** button to save the wanted portion.
4. In the **Save As** dialog box, locate on where user wants to save the file, type the filename, and select the video format.

4.3.2 Playback DVR Recorded File from Hard Disk

1. Please have the hard disk which containing of recorded video data install on your PC or using external USB enclosure to connect to your PC.
2. Click **Open File** button
3. Select **DVR Recorded File(HD)** and click **OK**.
4. Select the hard disk drive from **Select Disk** window and click **OK**.

5. And then, the **Event List** window appears. Select the event that user wants to play and click **OK**.

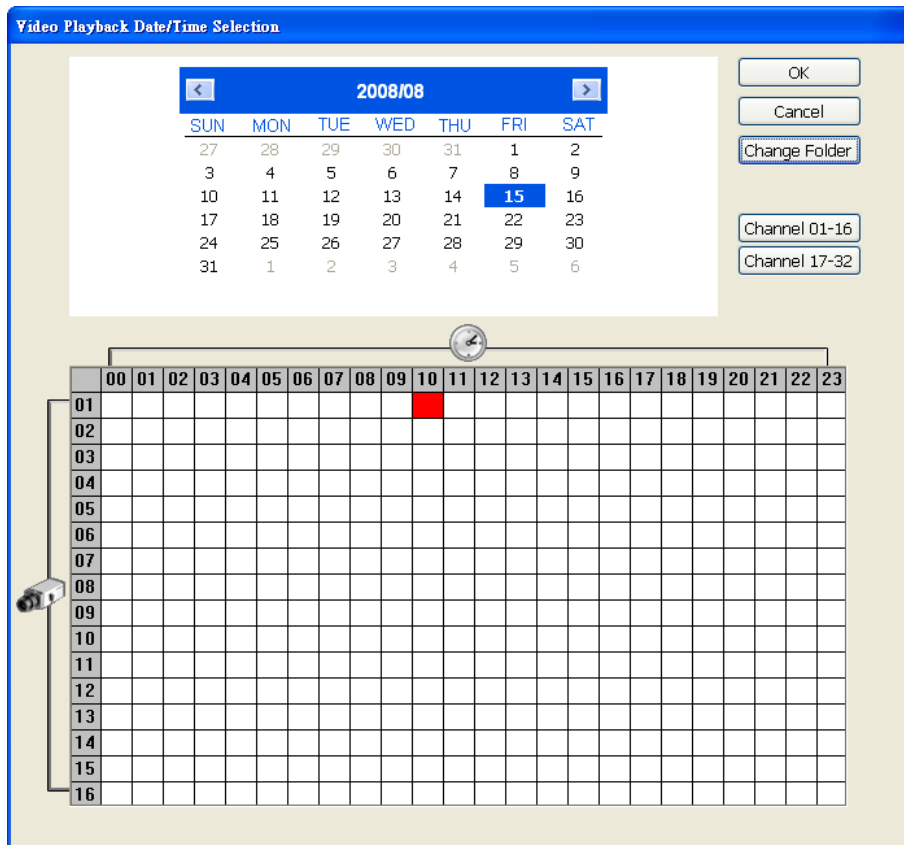

4.3.3 Playback Backup File(*.dvr)

1. Click Open File button.
2. Select **Backup File(*.dvr)** and click **OK**.
3. Locate the backup file folder and click **OK**.

 When open the backup video file, just locate the where backup file folder is.

4. And then, Playback Date/Time Selection window appears. Select the date and time and click **OK**.

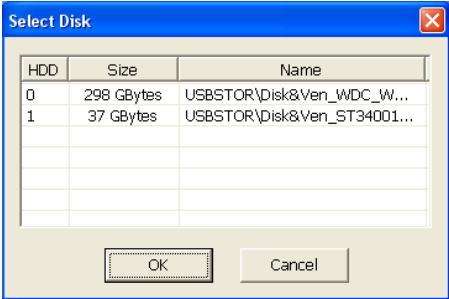

HDD Backup application provides user an interface to view recorded video from hard disk and backup it.

5.1 Familiarizing with HDD Backup Application

Name	Function
(1) Date	Select the date for events
(2) Hour and Channel	User can select the hour and channel for events. : All events in this hour and channel have been selected. : In this hour and channel has events : Partial of events in this hour and channel has been selected.
(3) Event list	All recorded video events list - No.: the list order number - Record: the record type(A: Always Record/ B: Button Record/ L: Alarm Record) - Begin Time: the beginning of record time - End Time: the end of record time
(4) Set Marked File	Use Ctrl and mouse to select the multiple events from event list, and then click Set Marked File to mark multiple events. When click Set Marked File button, the marked event will turn to un-mark and un-mark event will turn to marked.
(5) Page Switch	- Pre: go back last page - Next: go to next page - Page column: enter the page number and click Go button to go to the page
(6) Select All	Select all listed recorded video events. Click the check box again to cancel for selecting all events.
(7) Video display	Display first frame of each recorded video channel from 4 selected.
(8) Progress bar	Show the progress of the event being played. User may move the bar to seek at any location of the track

Name	Function
(9) Source Disk	To select the hard disk drive
	
(10) Target Path	To locate on where user wants to save the file
(11) Event (%)	Display the backup progress rate of event in percentage
(12) Total (%)	Display the total backup progress rate in percentage
(13) Stop	Stop backup progress
(14) Start	Start backup progress

5.2 To Backup Recorded Video File

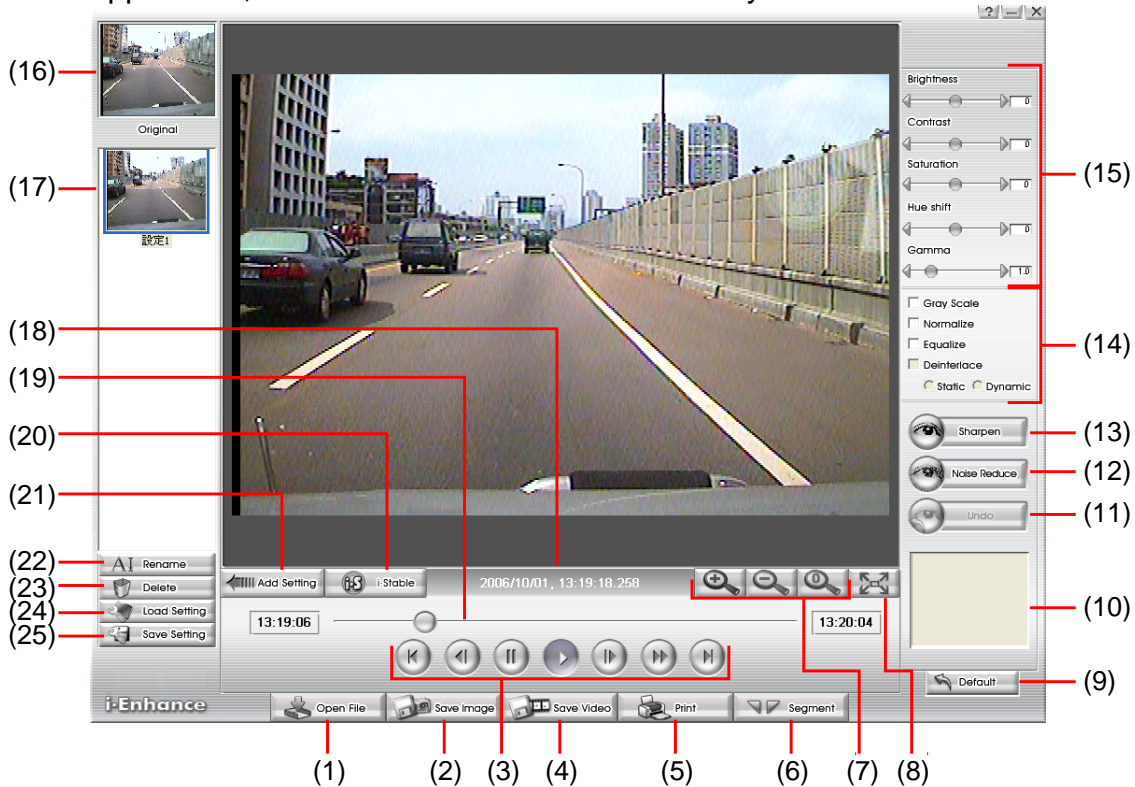

1. Please have the hard disk which was recording video on the DVR system install on your PC or using external USB enclosure to connect to your PC.
2. To run the HDD Backup application, click the **HDD Backup** button on USB Playback Application main interface.
3. Click **Browse** in **Source Disk** to locate the recorded video file.
4. And then, the **Select Disk** windows will appear as below:

5. Select the hard disk drive from **Select Disk** windows. All available hard disk will list on the **Select Disk** windows with size and name
6. Select the hard disk drive and click **OK**
7. And then, all the recorded video files will list out.
8. Select the event which user wants to backup. Or mark the **Select All** to select all listed recorded video event
9. Locate on where user wants to save the backup file
10. Click **Start** to process backup
11. To stop the backup progress, click **Stop**
12. To play the backup file, see [4.3.3](#).

The bundled iEnhance is a video editing tool and can only be used with *.dvr and *.avf video file. It allows you to adjust the video picture quality, segment and save the selected portion of the video, zoom in and out the image, and print or save the screen shot. You can also save the setting and apply it on other files.

To run iEnhance application, click **iEnhance** button on USB Playback Console interface.

Name	Function
(1) Open File	Access *.dvr or *.avf video file.
(2) Save Image	Capture and save the screen shot in *.bmp format.
(3) Playback Control Buttons	<ul style="list-style-type: none"> Begin: Move at the beginning of the video file. Previous: Go back to previous frame. Pause: Briefly stop playing the video file. Play: Play the video file. Faster: Go to the next frame. Next: Play the video file at the faster speed. End: Go to the end of the video file.
(4) Save Video	Save the edited or segmented video in *.avi format.
(5) Print	Print the screen shot.
(6) Segment	Mark the beginning and the end of the selected portion of the video. Two triangle marks will appear on the slider. To cancel video segmentation, click this button again.
(7) Zoom Buttons	Enlarge, reduce, and set the image back to normal size.
(8) Full Screen	Use the entire screen to only display the video.
(9) Default	Set the video back to original state and delete all the changes in the history box.
(10) History Box	List all the actions.

Name	Function
(11) Undo	Delete the last action.
(12) Noise Reduce	Adjust the softness and repair the damaged colours.
(13) Sharpness	Improve the overall image by enhancing edges. This gives the image more depth.
(14) Effects	<p>Gray Scale: convert the image into black and white (monochrome).</p> <p>Normalize: adjust the brightness intensity.</p> <p>Equalize: automatically adjust the images that are too dark.</p> <p>De-interlace: smooth out the overlying frames.</p> <ul style="list-style-type: none"> ■ Static: de-interlace for motionless scene. ■ Dynamic: de-interlace for moving scene.
(15) Picture Adjustment	Adjust the Brightness, Contrast, Saturation, Hue and Gamma.
(16) Original Screen	Display the original state of the image.
(17) Temporary Setting Block	Display the sample settings. Click the sample to apply the setting on the current video.
(18) Status Bar	Display the date, and time of the video.
(19) Progress Bar	Show the progress of the file being played. You may move the bar to seek at any location of the track.
(20) iStable	To reduce the jolt in the recorded video.(also see Chapter 6.1)
(21) Add Setting	Include the new setting to the temporary setting block.
(22) Rename	Change the name of the selected setting in the temporary setting block.
(23) Delete	Permanently remove the selected setting in the temporary setting block.
(24) Load Setting	Call the saved settings.
(25) Save Setting	Store the settings in the temporary setting block.

6.1 To Use iStable

The iStable function can reduce the jolt in the recorded video.

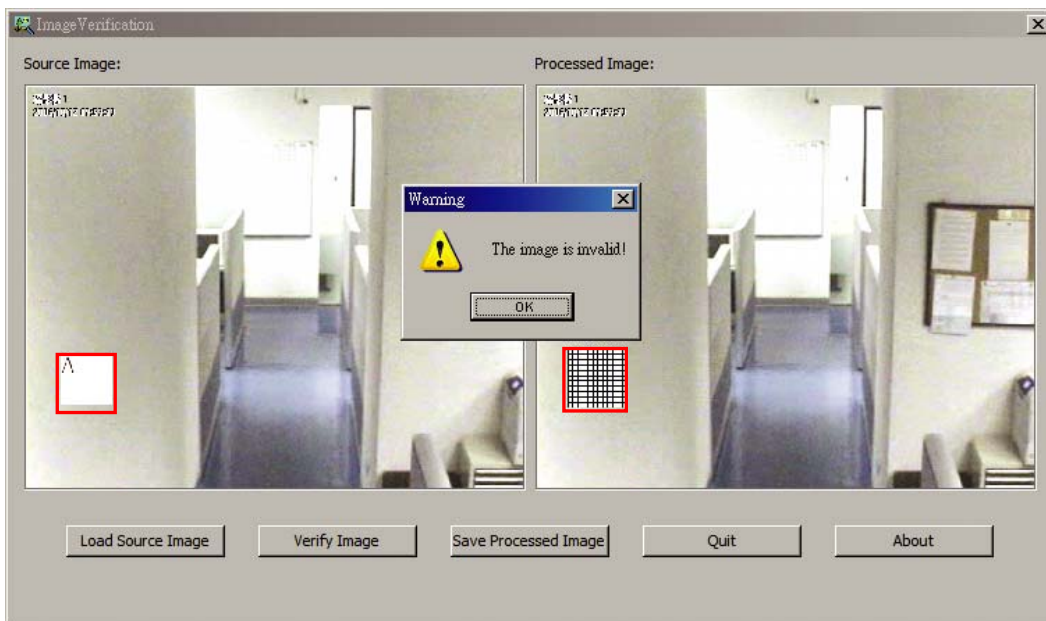

1. Click **Open File** button and select the recorded video.
2. And then, click **iStable** button.
3. iStable windows will show up.
4. Select the **smoothness** level – 1(Low), 2, 3, 4, and 5(High). The default value is 3.
5. Click Play button, and then iStable function will start to initial the recorded video.
6. When the initialize is done, user will see the original and stabilized recorded video play in two windows.

Image Verification is a watermark-checking program to identify the authenticity of a saved image (e.g. by snapshot). This program can only verify uncompressed bmp image files.

7.1 To Run the ImageVerification

1. To run the ImageVerification application, click the **Watermark** button on USB Playback Application main interface.
2. In the ImageVerification screen, click **Load Source Image** and locate the image source.
3. Click **Verify Image** to begin the process.
4. Check the result in the **Processed Image** screen. If the picture is unmodified, the image in the **Source Image** and **Processed Image** screen would be exactly the same. If the picture is being modified, a warning dialog box would prompt and the modified area is highlighted.

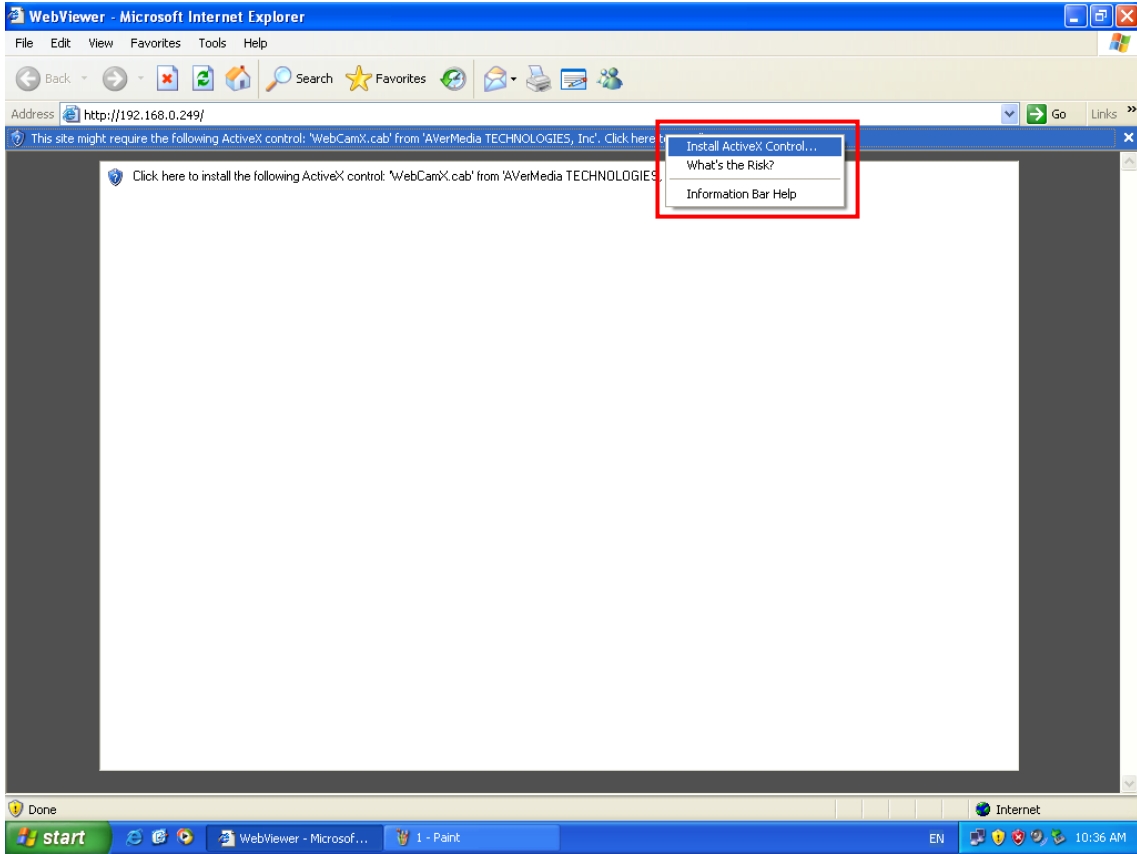

USING THE REMOTE PROGRAMS CHAPTER 8

User can use Microsoft Internet Explorer to access DVR system by entering the IP address. To use this feature, make sure that your PC and DVR server both are connected to the internet and the Network feature is enabled.

Accessing this feature for the first time you will be prompted by your browser to install WebCamX.cab, allow the installation and you should be able to connect and login afterwards.

Click to install ActiveX if your PC required to be installed.

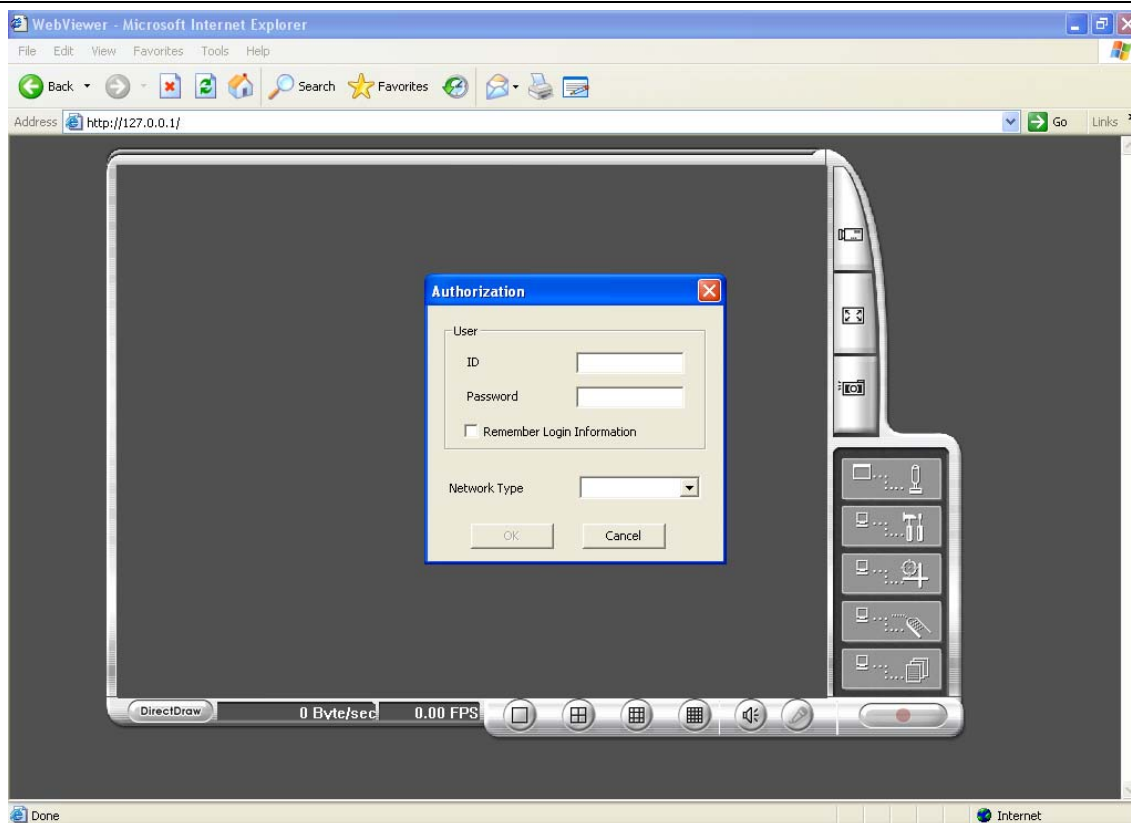

And then, Click **Install** when the Internet Explorer - Security Warning dialog box appears.

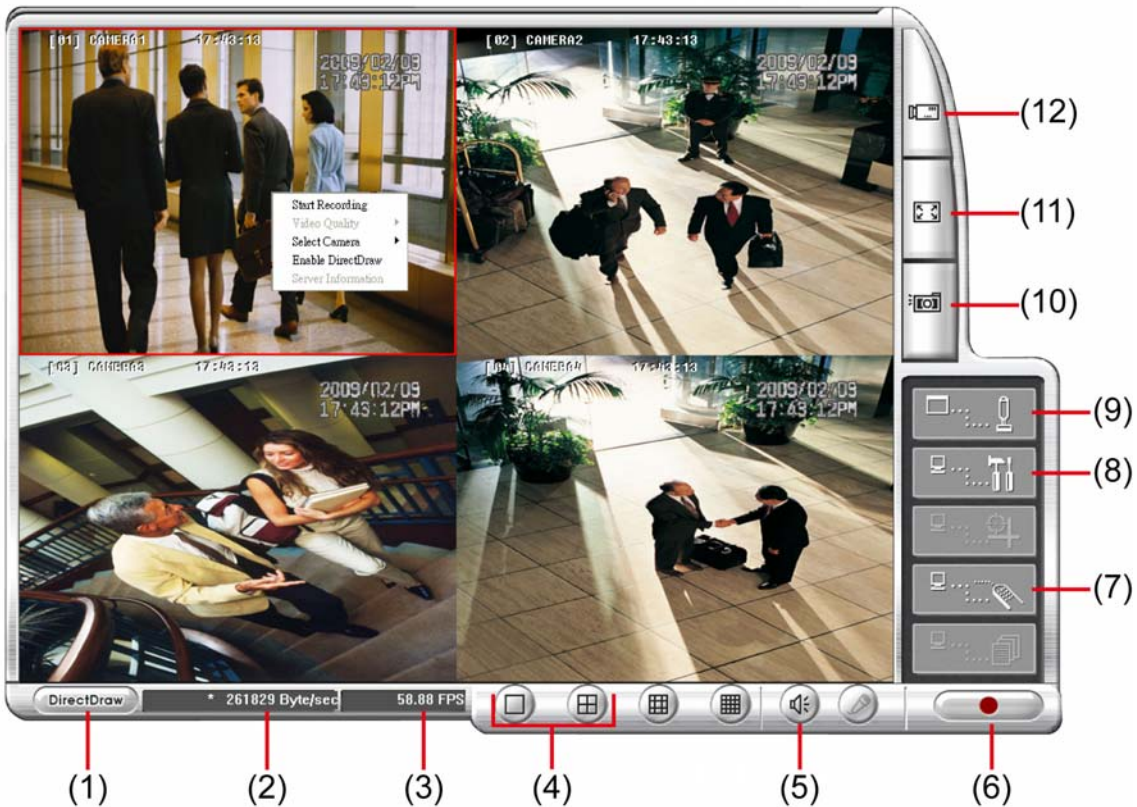

After installing the WebCamX.cab and when connecting to the DVR system, you are required to enter default account ID (default is **ADMIN**) and password (default is **111111**) and select the type of network.

i Changing account password is strongly recommended.

8.1 Familiarizing the WebViewer Buttons

Right-clicking on the WebViewer video screen, enables you to start video recording, switch camera and enable/disable DirectDraw.

Name	Function
(1) DirectDraw	Enhance the video quality.
<p>i Not all graphic cards can support this function. If you cannot see the screen display correctly or screen is messed, please check with VGA card vendor.</p>	
(2) Received file size	Indicate the size of the data being sent per second.
(3) Camera frames	Indicate the number of frames per second.
(4) Split screen view	Click to view one camera or all cameras on screen simultaneously.
(5) Audio	Enable/disable remote sound.
(6) Record	Start to record the video of the selected camera in AVI format. Directly click screen to select the channel that user wants to record and press Record button.
(7) Remote Console	Initiate Remote Console. It allows you to control DVR server (see also Chapter 8.3).
(8) Remote setup	Change the DVR server settings (see also Chapter 8.1.1).
(9) PTZ Control	Initiate PTZ camera controller(see also Chapter 8.2)
(10) Snapshot	Capture and save the screen shot in *.bmp format.
(11) Full screen	Use the entire area of the screen to only display the video. To return, Right-click or press ESC on the keyboard.

Name**Function**

(13) Select cameras to view

Select to the view camera from different server. In Select Camera dialog box, Display column, click to enable/disable viewing the camera.

Click **Add Server** and select the server type between DVR and IP Cam to add.

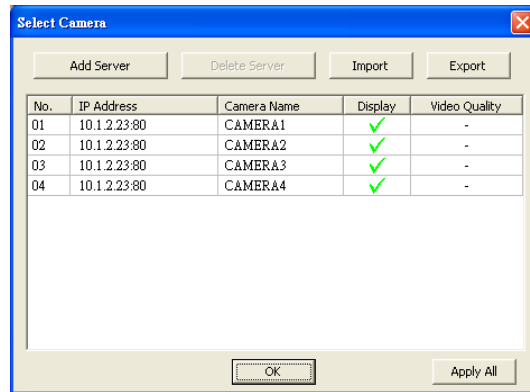

Click **Delete Server** to delete the selected item.

Click **Import** to load the previous saved list.

Click **Export** to save the list.

Click **Apply All** to change all the camera video quality based on the selected setting.

Click **OK** to exit.

8.1.1 To Setup Remote System Setting

Click **OK** to exit and save the setting and **Cancel** to exit without saving the setting. The setting here applies to Remote DVR system only.

i After changed the DVR system setting, refresh your web browser in order to apply the new setting to the DVR system.

8.1.1.1 System Setup

The screenshot shows the 'System Setup' window with four sections highlighted by red lines and numbered (1) through (4):

- (1) Video Out Setting:** Includes 'Video Output' (VGA), 'Resolution' (SVGA), 'Sharpness' (slider at 0), and 'Color Enhance' (slider at 0).
- (2) DLS Setting:** Includes 'Enable DLS' (checked), 'Time Offset' (60 min), 'Start Time' (2000/01/01 00:00), and 'End Time' (2000/01/02 00:00).
- (3) MISC:** Includes 'Time Sync.' (checked), 'Time Format' (MM/DD/YYYY), 'Time Zone' (GMT 8:00), 'Disk Overwrite' (checked), and 'NTP Server' (empty field).
- (4) Display:** Includes 'VGA-TV Selection' (Main-Main), 'Spot Mode' (Quad), 'Auto Scan' (checked), 'CH 1' through 'CH 4' (sliders at 5 Sec), and 'Event Duration' (Adjustable, Set Duration at 10 Sec).

(1) Video Out Setting

- **Video Output:** Select the **Video output** source (**VGA** or **TV**) to configure the value of **Resolution**, **Sharpness** and **Color Enhance**.
- **Resolution:** Select the video display resolution.
 - **SVGA:** 800 x 600
 - **XGA:** 1024 x 768
 - **SXGA:** 1280 x 1024
- **Sharpness:** Adjust the sharpness of display video.
- **Color Enhance:** Adjust the color enhancement of display video.

(2) DLS Setting

Mark **Enable DLS** check box to enable daylight saving. And then, select the **Start** and **End Time** by click **setting**.

- **Time Offset:** Assign a time that it is for daylight saving time offset in your time zone. For example: if the time zone is in U.S. Eastern, the time offset is 1 hour.

(3) MISC

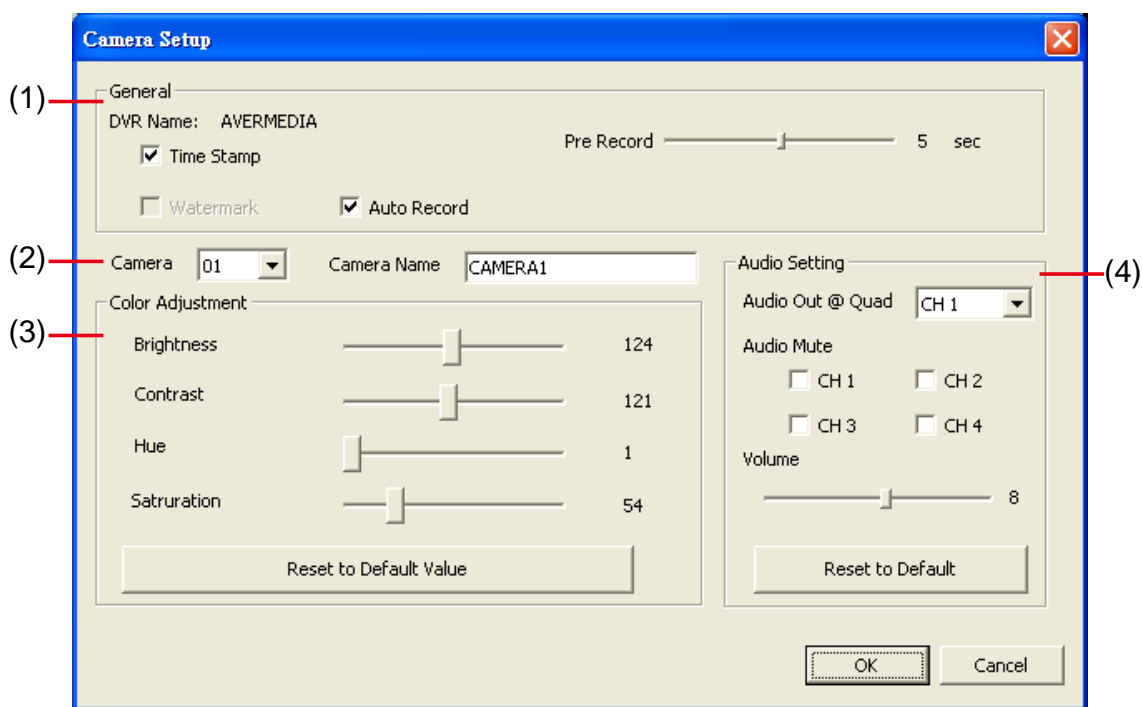

- **Time Sync.:** Enable/disable Network Time Protocol to adjust the time of system from the network time server.
- **Time Zone:** Select the time zone of DVR located.
- **Sync Type:** Select the ways of the network time synchronize.
- **NTP Server:** Enter the URL of the network time server.

- **Time Format:** Select the format of time and date for the DVR system.
- **Disk Overwrite:** Enable/disable replacing the earliest record when the hard disk space runs out. By default, the HDD overwrite setting is enabled

(4) Display

- **VGA-TV Selection:** Select the VGA and TV output order.
 - ✓ **MAIN - MAIN:** Both VGA and TV output surveillance video on screen.
 - ✓ **MAIN – SPOT:** VGA output surveillance video and TV output the alarm event video.
 - ✓ **SPOT – MAIN:** VGA output alarm event video and TV output the surveillance video.
- **SPOT Mode:** To select the display mode (**QUAD** or **Channel** (1, 2, 3, or 4)) on spot monitor when there is no alarm event.
- **Auto scan:** Enable/disable auto cycle switch to display the next channel when in full screen mode.
- **Event Duration:** Select the type of event duration.
- **Set Duration:** Set a time gap (10 ~ 999 seconds) before switch back to preview screen mode after display the alarm event.

8.1.1.2 Camera Setup

(1) General

- **Time Stamp**
Enable/disable the time and date display on the each channel.
- **Auto Record**
Enable/disable auto continue recording when interrupted (i.e., power breakdown, video playback or configuration setup). It starts to record after 10 second of idleness. This is applicable in Always Record mode.
- **Pre Record**
Set the pre-recording time in seconds when alarm has occurred.

(2) Camera

Select the camera and enter a name for the camera.

(3) Color Adjustment

Select the camera and adjust the **Brightness**, **Contrast**, **Hue** and **Saturation** of the selected camera. Click **Reset to Default Value** to set all video setting back to the default.

(4) Audio Setting

Click **Reset to Default Value** to set all video setting back to the default.

- **Audio Out @ Quad**

Select the channel to output the audio signal While QUAD mode. Please make sure the audio output device (such as a speaker) is connected to DVR unit.

- **Audio Mute**

Enable/disable to hear audio sound while playback. To hear sound, make sure the unit is connected to a speaker.

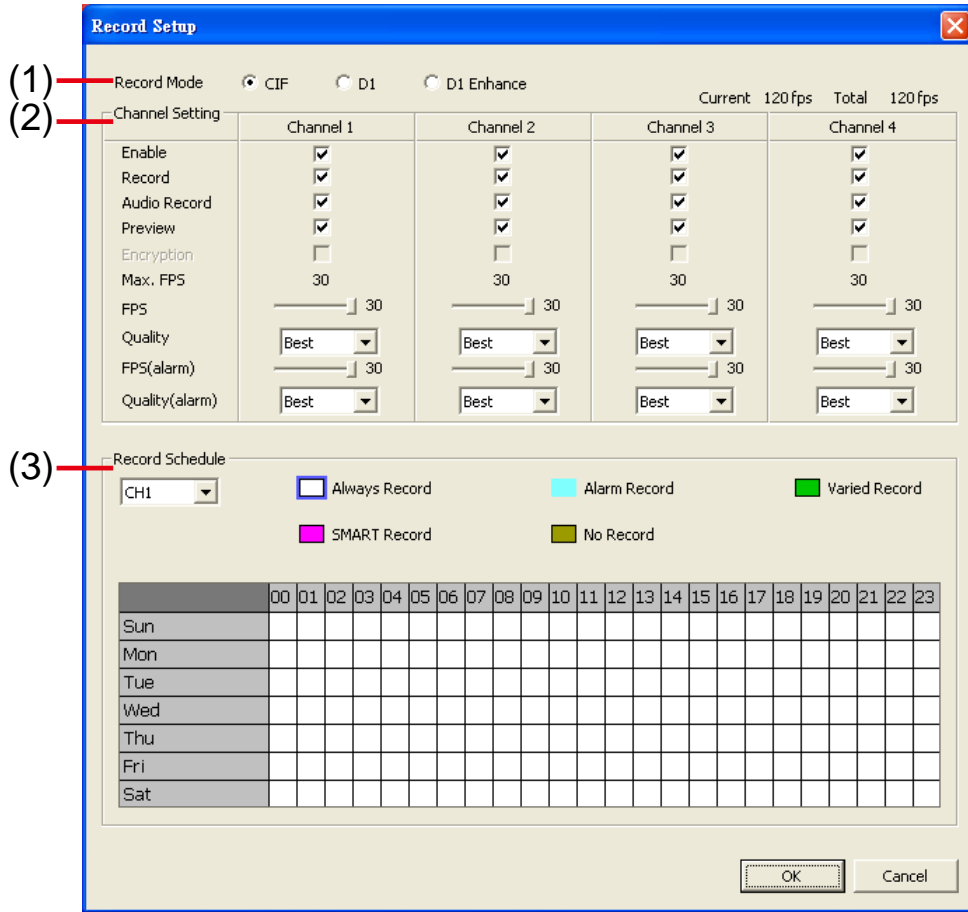

If you want to hear the voice when you playback the recorded file on this DVR, please make sure that you have disabled **Audio Mute**.

- **Volume**

To adjust audio output volume.

8.1.1.3 Record Setup

(1) Record Mode

Select **D1/CIF/D1 Enhance** recording mode.

Under **D1** mode, the total recording frame rate is **60/50fps** (NTSC/PAL). The video recording is in full screen resolution and takes turns from one channel to the next one when **Auto Scan** enables. Each channel is recorded only at a maximum frame rate of 30/25 fps (NTSC/PAL). User can switch to view the video in single full screen or QUAD screen.

In **D1 ENHANCE** mode, the total recording frame rate is **30/25fps** (NTSC/PAL). Each channel can be recorded at a maximum frame rate of 30/25 fps (NTSC/PAL).

Whereas in **CIF** mode, the total recording frame rate is **120/100fps** (NTSC/PAL). The video recording is at a lower resolution, but all channels can be recorded at a maximum frame rate of 30/25 fps (NTSC/PAL). User can switch to view the video in single full screen or QUAD screen.

(2) Channel Setting

Setup parameters of each channel.

- **Enable**

Enable/disable the channel to display the video on the surveillance screen. If the channel is disabling, there won't be any video display and recording.

- **Record**

Enable/disable the channel number to record video.

The channels are enabled can be set for video recording.

- **Audio Record**

Enable/disable audio recording. To record sound, make sure the audio input device (ex: microphone) is connected to the DVR unit.

- **Preview**

Enable/disable the video preview on the surveillance screen.

- **Max. FPS**
Display the maximum frame rate of recording that user has set. Maximum fps total value depends on the **RESOLUTION** that user has chosen.
- **FPS**
Set the number of frames per second to be recorded. The higher the frame rate, it uses more hard disk space.
- **Quality**
Select the video quality setting from **BEST, HIGH, GOOD, MEDIUM, NORMAL** or **LOW**. Choosing higher quality allows user to record less hours but the quality of the recorded video is better.
- **FPS(alarm)**
Set the number of frames per second to be recorded when alarm has occurred. The higher the frame rate, it uses more hard disk space.
- **QUALITY(alarm)**
Select the video quality (**BEST, HIGH, GOOD, MEDIUM, NORMAL** or **LOW**) of alarm recording. Choosing higher quality allows user to record less hours but the quality of the recorded video is better.

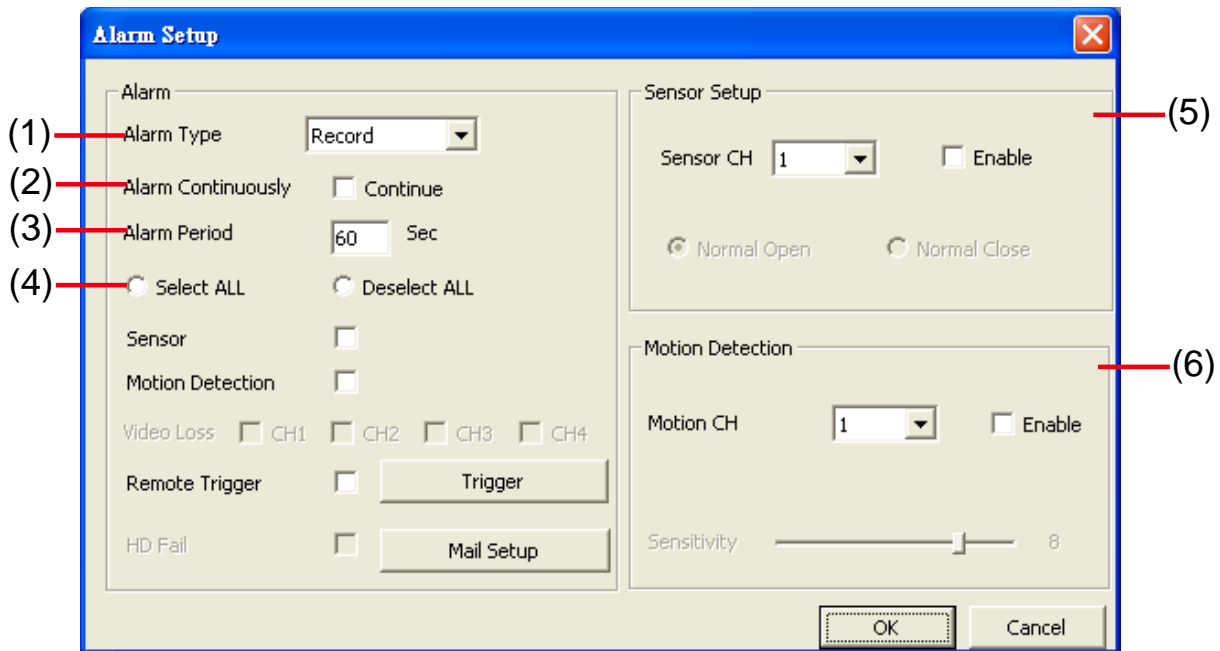

(3) Record Schedule

By default, in 24 hours, the recording schedule is set to always record every hour. Refer to the table below to customize the recording condition.

Condition	Description
NO RECORD	Not recording at all
ALWAYS RECORD	Non-stop recording
ALARM RECORD	Start recording when the alarm is activated. The alarm activates status according to the setting in ALARM SETTING .
SMART RECORD	Automatically switch to recorded at the frame rate of FPS (alarm) that is setup in CAMERA CHANNEL SETTING once an alarm is detected and if there is no motion, it records at the frame rate of FPS that is setup in CAMERA CHANNEL SETTING .
VARIED RECORD	When each channel has different record schedule, the record schedule table will display in Green color that is indicated as VARIED RECORD .

Select the channel to setup record schedule. Click the type of schedule and select hour (00~23) and day (Mon ~ Sun), and then, click **OK** to complete the schedule setting.

8.1.1.4 Alarm Setup

(1) Alarm Type

Select the way of alarming – **Record**, **EMAIL**, or **RELAY**.

(2) Alarm Continuously

Enable/disable to execute the alarm action (**ALARM TYPE**) continuously when alarm has been trigger. The alarm action is according to the setting of **ALARM TYPE** that user has setup.

When **ALARM CONTINUOUSLY** has been started, it won't be stop until the recording has been stop manually.
If **ALARM CONTINUOUSLY** has been enabled, the **ALARM PERIOD** won't be able to configure.

(3) Alarm Period

Set the amount of time (in seconds; 0~ 999) for stop alarm action after alarm has been reset.

If **ALARM CONTINUOUSLY** has been enabled, the **ALARM PERIOD** won't be able to configure.

(4) Select/Deselect ALL

To enable/disable all below selection.

Video Loss and **HD Fail** only available when the Alarm Type is **Email** or **Relay**.

- **Sensor**

Enable/disable to send out the alarm if sensor has been triggered according to the setting of **SENSOR SETTING**.

- **Motion Detection**

Enable/disable to send out the alarm if motion has been detected.

To activate the motion recording, please enable the **Motion Detection** in this section or [Alarm Setting](#) of [Chapter 3.1](#) and configure the record mode as **ALARM RECORD** in [Chapter 7.1.1.3](#) or [RECORD SCHEDULE](#) of [Chapter 3.1](#).

- **Video Loss**

Issue an alarm when t selected channel's video is lost.

- **Remote Trigger**

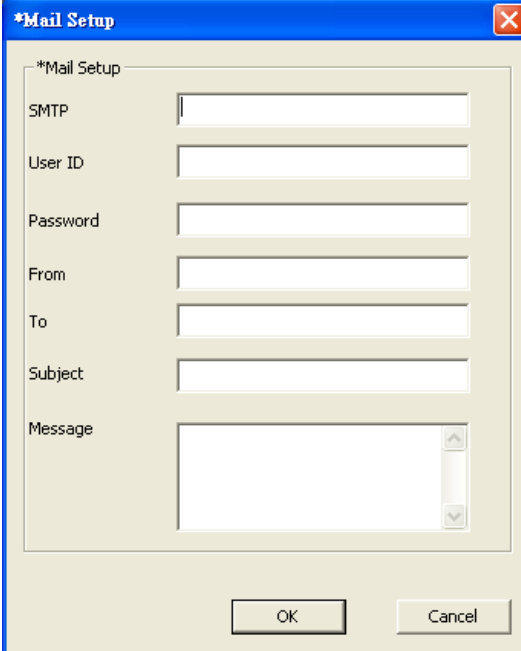

Allow user to trigger alarm from remote site. Click **Trigger** button to trigger.

- **HD Fail**

Issue an alarm when hard disk of DVR system is failed.

- **Mall Setup**

- ✓ **SMTP:** Enter the SMTP server
- ✓ **User ID & Password:** Enter User ID and Password for e-mail server user identification
- ✓ **From:** Enter the sender e-mail address
- ✓ **To:** The recipient e-mail address and separate it with a semicolon
- ✓ **Subject:** Enter the message title
- ✓ **Message:** Type the message

The image shows a dialog box titled "*Mail Setup" with a close button in the top right corner. The dialog contains the following fields:

- SMTP: A single-line text input field.
- User ID: A single-line text input field.
- Password: A single-line text input field.
- From: A single-line text input field.
- To: A single-line text input field.
- Subject: A single-line text input field.
- Message: A multi-line text area with scroll bars.

At the bottom of the dialog are two buttons: "OK" and "Cancel".

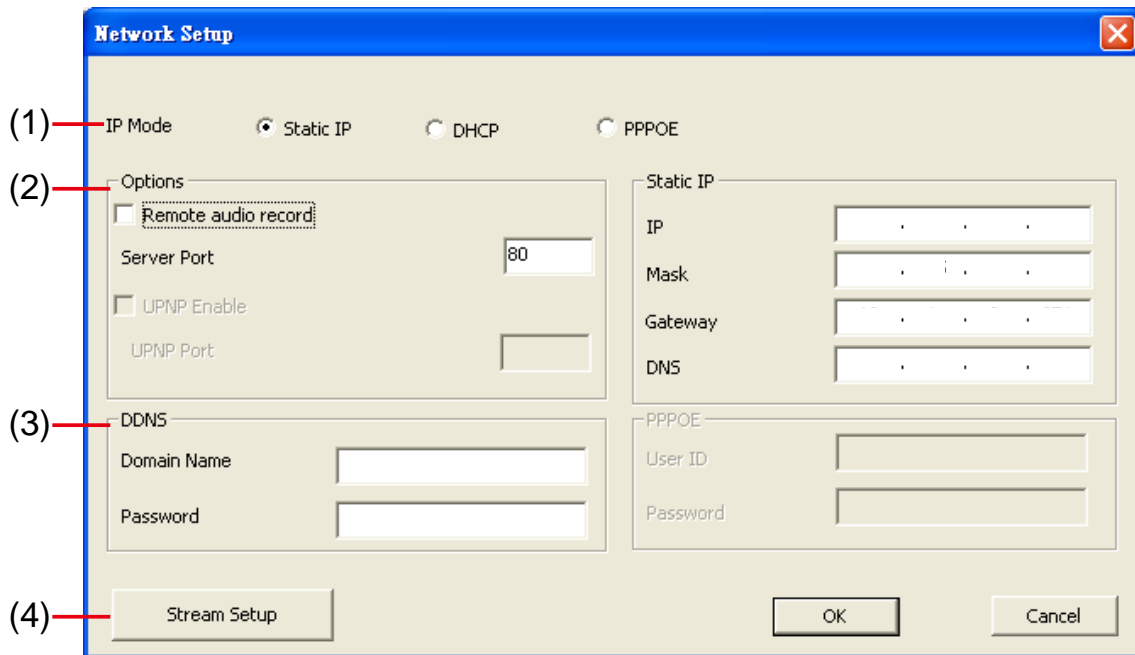

(5) Sensor

Enable/disable initial state of the attached sensor of the channel.

(6) Motion Detection

Enable/disable the channel to detect motion.

8.1.1.5 Network Setup

(1) IP Mode

The system provides 3 types of IP setup mode – STATIC, DHCP, and PPPOE.

- **STATIC:** Assigns a constant IP address for the DVR system.
- **DHCP:** Assign the IP address by local DHCP server to DVR system.

i The DHCP (Dynamic Host Configuration Protocol) is a set of rules used by a communications device (such as a computer, router or networking adaptor) to allow the device to request and get an Internet address from a server which has a list of addresses available for assignment

- **PPPOE:** Point-to-Point Protocol over Ethernet is a network protocol for encapsulating PPP frames in Ethernet frames. It is used mainly with ADSL services. If your network is using ADSL service connecting to internet, and then, select PPPOE mode.

(2) Remote audio record

Enable/disable the audio recording at remote site.

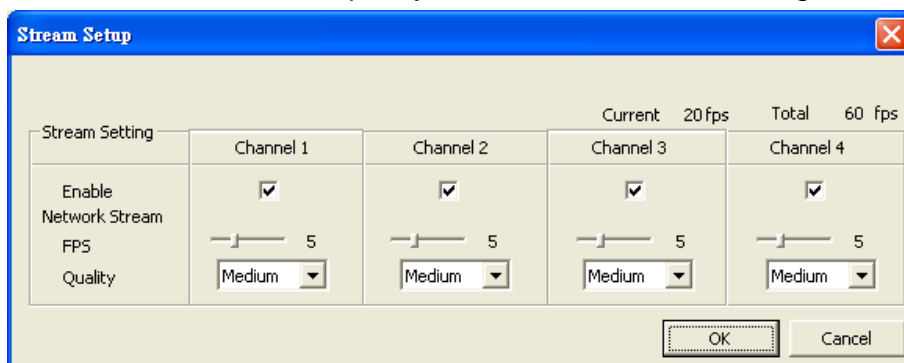

(3) DDNS

Dynamic Domain Name Service is a data query service mainly used on the Internet for translating domain names into Internet addresses.

- **Domain Name:** Enter the domain name that user has registered.
- **Password:** Enter the password that user has setup when registered the domain name.

(4) Stream Setup

Click it to setup each channel stream and quality for the remote site viewing.

- **Enable**
Enable/disable the channel. If channel is disabled, the video stream will not be seen in remote site and transmitting to remote site.
- **Network Stream FPS**

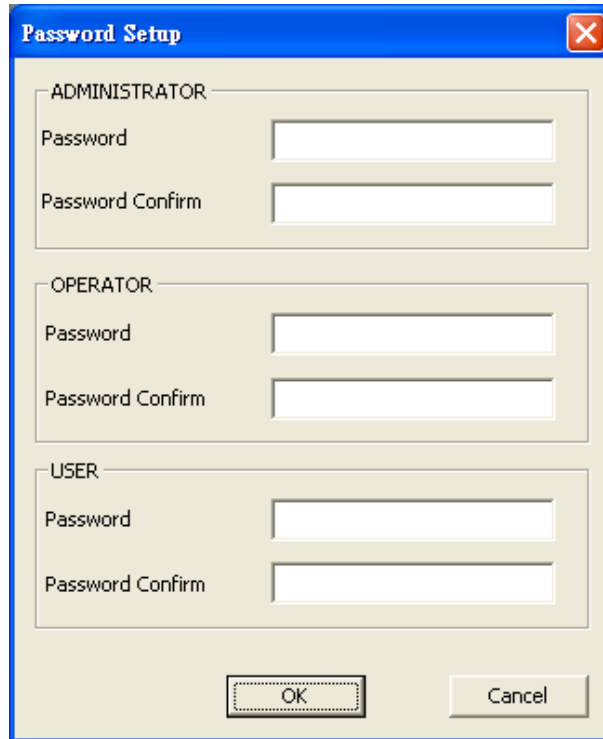

Set the stream FPS of channel. Scroll the bar to adjust the fps.

- **Quality**

Select the quality of the channel.

8.1.1.6 User Setup

To change Admin, operator, and user account's password. Enter the new password in **Password** and re-enter again in **Password Confirm**. Click **OK** to complete the change.

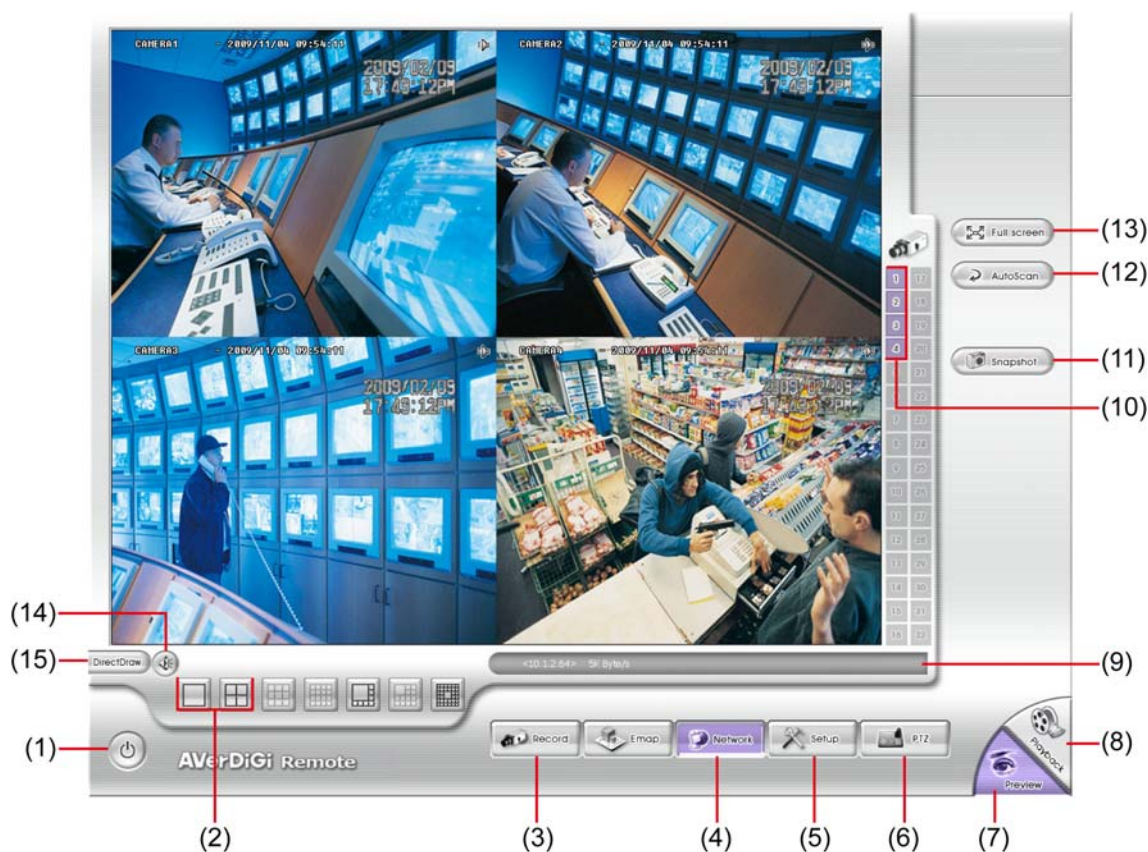

The image shows a 'Password Setup' dialog box with a blue title bar and a close button (X) in the top right corner. The dialog is divided into three sections: ADMINISTRATOR, OPERATOR, and USER. Each section contains two text input fields: 'Password' and 'Password Confirm'. At the bottom of the dialog, there are two buttons: 'OK' and 'Cancel'.

8.2 Familiarizing the WebViewer PTZ Buttons

Name	Function
(1) Direction buttons	Adjust and position the focal point of the PTZ camera. Click the center to pan automatically.
(2) Zoom +/-	Zoom in and out the image.
(3) Select PTZ	Choose to enable/disable the PTZ camera. In the Select PTZ dialog box, Select column, click to enable/disable viewing and controlling the PTZ camera. Click OK to exit and save the setting and Cancel to exit without saving the setting.
(4) Focus +/-	Adjust the focus manually to produce clear image.
(5) Auto Pan Groups	Operate the PTZ cameras automatically based on the selected camera group preset position number.
(6) Camera preset position number	Move the PTZ camera to the preset point. The reset point (1~9) is based on the user has setup by remote control at local site.

8.3 Familiarizing the Remote Console Buttons

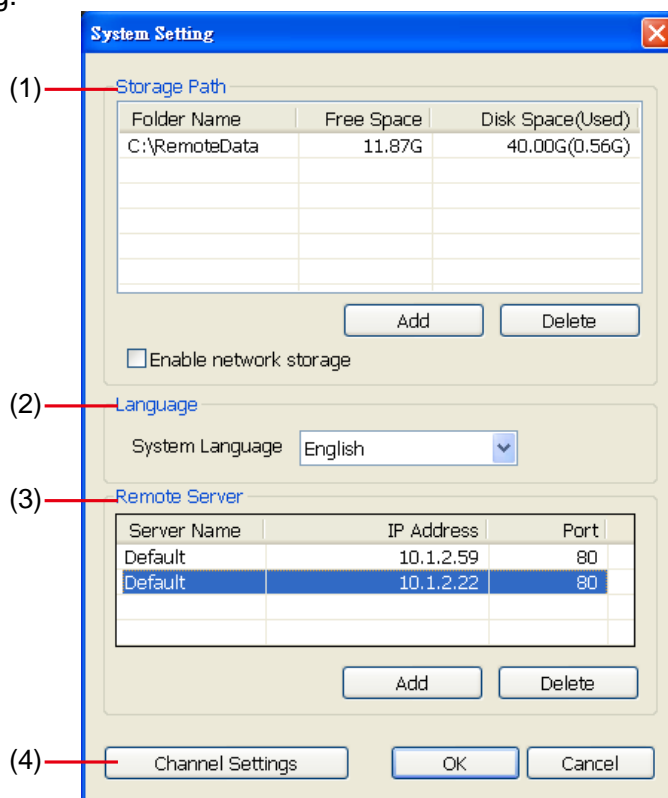

Name	Function
(1) Exit	Close/minimize remote console application
(2) Split Screen Mode	Select from 2 different split screen type to playback the recorded video file of all the cameras or one camera on the screen.
(3) Record	Start/stop video recording.
(4) Network	Enable/disable remote system access. This feature allows you to access DVR server from a remote location via internet connection.
(5) Setup	Configure the Remote Console setting. (see also Chapter 7.3.1)
(6) PTZ	To call out PTZ control panel for controlling PTZ camera.
(7) Preview	Switch to Preview/Playback mode. This allows you to view live camera display.
(8) Playback	Switch to Playback mode. This allows you to view the recorded video file. (see also Chapter 7.4)
(9) Status Bar	Display the current date, time and hard disk free space.
(10) Camera ID	Show the number of cameras that are being viewed. When you are in single screen mode, click the camera ID number to switch and view other camera.
(11) Snapshot	Capture and save the screen shot either in *.jpg or *.bmp format.
(12) Auto Scan	Enable/disable channel auto cycle switch.
(13) Full screen	Use the entire area of the screen to only display the video. To return, Right click the mouse or press ESC on the keyboard.
(14) Audio	Enable/disable the sound display
(15) DirectDraw	Enhance the video quality.

i Direct Draw function supports for certain VGA card. For more information, please contact your VGA card vendor.

8.3.1 To Setup Remote Console Setting

Click **Setup** button to call out the **System Setting** windows. Click **OK** to exit and save the setting and **Cancel** to exit without saving the setting.

(1) Storage Path

Set the directory on where to save the data. When there is not enough free space to record one hour data, the system automatically replaces the oldest data. In case you have more than one storage path, the system automatically saves the data to the next storage path. By default the data is stored in C:\RemoteData, to insert another storage path, click **Add**. To remove the selected path, click **Delete**.

- Enable network storage

Select the Enable network storage check box to send the recorded video in network attached storage.

i To add network storage, the Internet storage drive/folder must be mapped as **Network Driver** in DVR server. To know how to assign or connect to a network drive, please refer to your Windows help file and search "**Map Network drive**".

(2) Language

Customize the system to display the tool tips and dialogs based on the selected language. By default the language is in English.

(3) Remote Server

Enter the DVR **Server IP** and **Server Port** number that user wants to remote connect it.

(4) Channel Settings

The numbers from 01 to 04 represent the camera ID. In

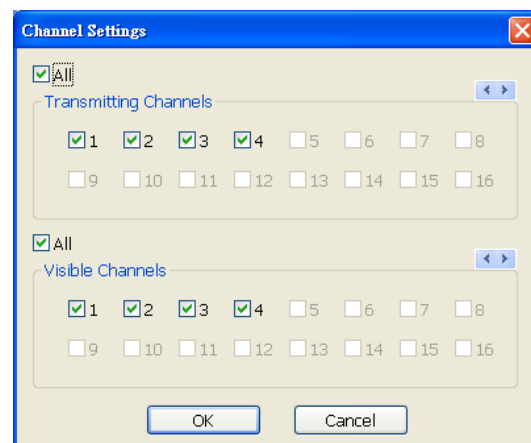

Transmitting Channels section, enable the camera number to

receive the camera signal from the server. In **Visible Channels**

section, enable the camera number to view the camera signal on

Remote Console screen. To select all the cameras, enable the **ALL**

check box.

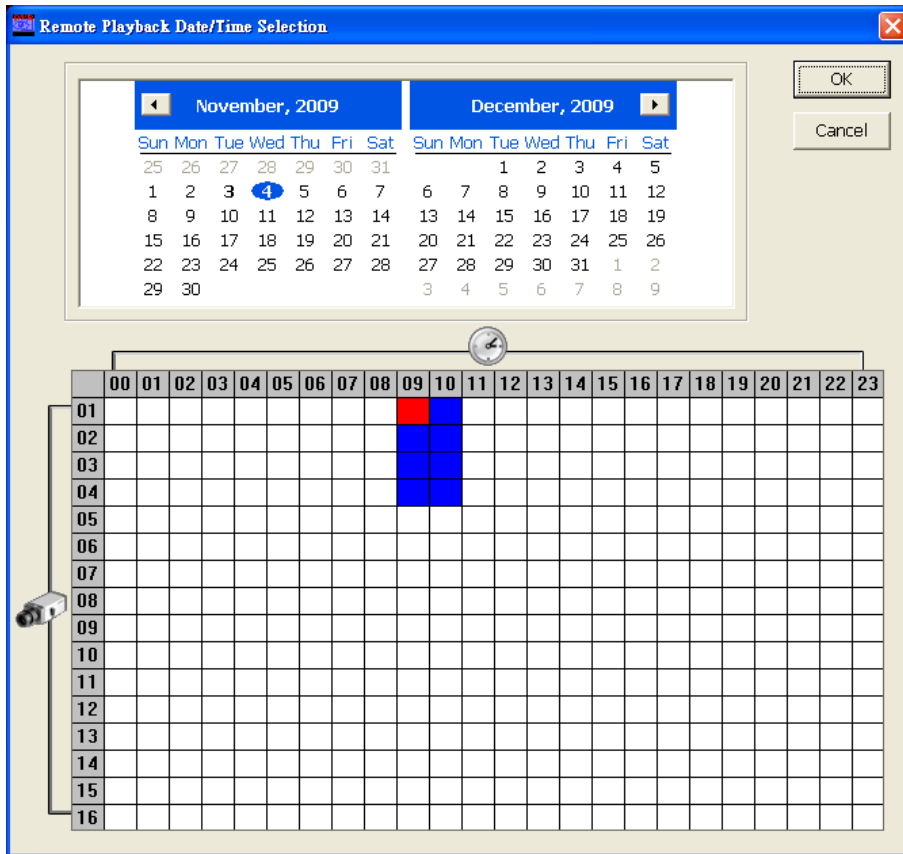

8.4 Using the Remote Playback

To use this feature, first switch to playback mode by clicking the **Playback** icon, and then, select the source of the file. In the **Select Playback Mode** dialog box, choose **Local Playback** to open the file that is recorded in the Remote Console, and **Remote Playback** to open the file that is recorded on the DVR server.

Click **OK** to proceed and **Cancel** to void this operation.

In the Remote Playback Date/Time Selection, the number from 00 to 23 represent the time in 24-hour clock. The numbers from 01 to 04 represent the camera number.

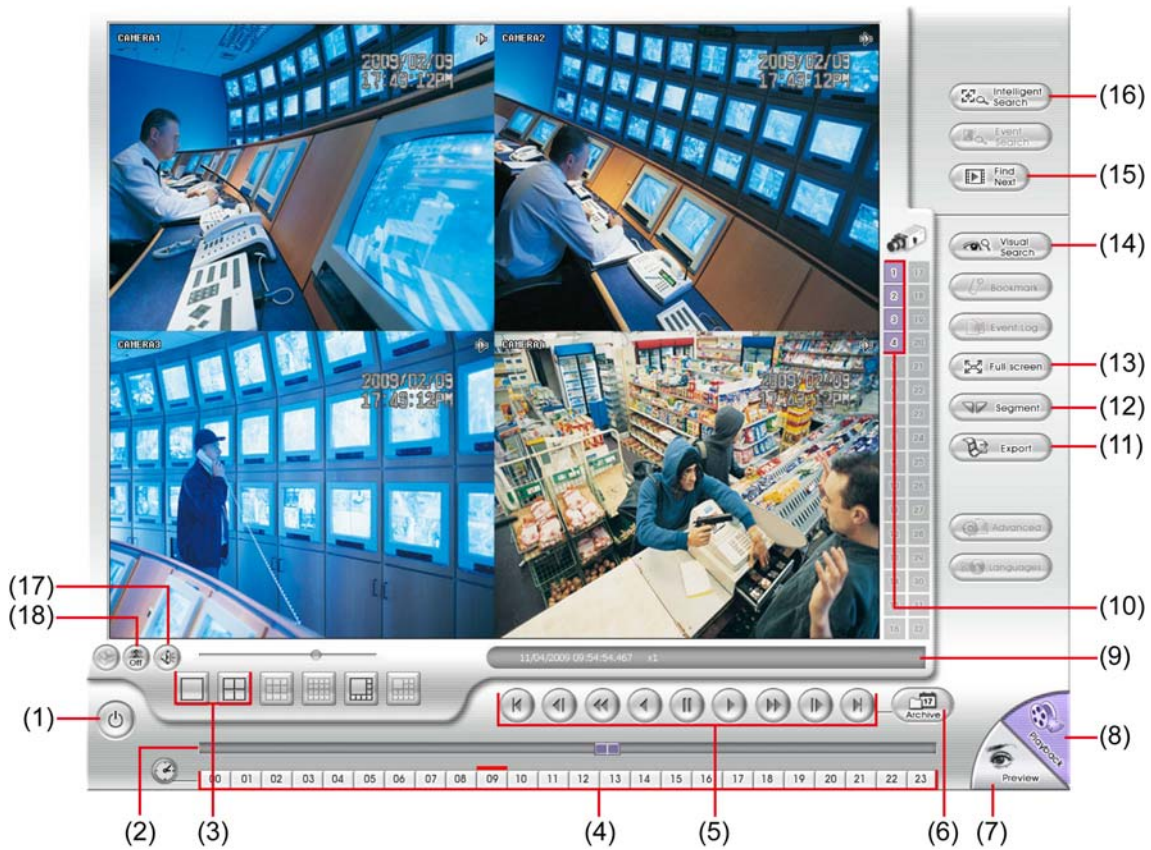

To Make a Selection:

1. Select the date in the calendar. Use ◀ and ▶ buttons to shift the calendar to the left or right.
2. In the table below, click on the blue block to select and open the recorded file. The blue block turns red when it is selected. The block that appears in white doesn't have data. You can only select one block when you choose Download and Playback.
3. Click **OK** to proceed and **Cancel** to void this operation.
4. The system divides the selected hour into 16 video thumbnails. In the Time Selection screen, click on the video thumbnail you want to download (see also [Chapter 7.4.3](#)).

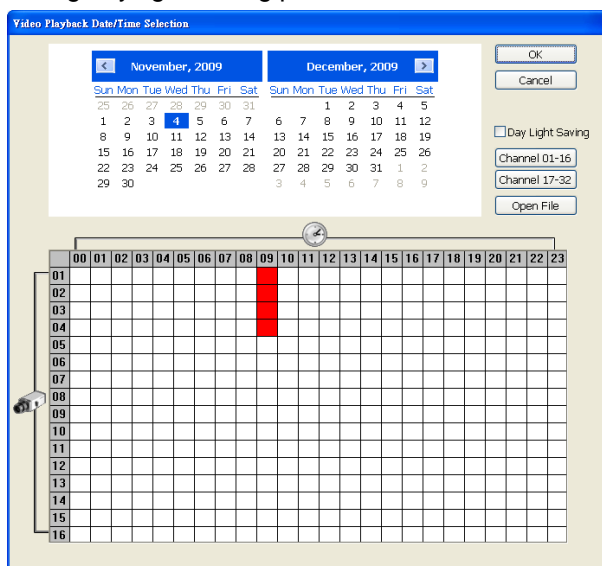

8.4.1 Familiarizing the Local Playback Buttons

Name	Function
(1) Exit	Click to exit or minimize the application. The password is required for exit or minimize. <div data-bbox="400 1095 780 1339" data-label="Image"> </div>
(2) Progress bar	Show the progress of the file being played. You may move the bar to seek at any location of the track.
(3) Split Screen Mode	Select from 2 different split screen type to playback the recorded video file of all the cameras, or one camera over the other or alongside on a single screen. <div data-bbox="97 1496 1501 1581" data-label="List-Group"> <ul style="list-style-type: none"> i - If there are only 4 cameras, you won't be able to switch to 8, 13, and 16 split screen mode. - To zoom in an area on the screen, Right click and Drag a square on the area you want to enlarge. To back to normal view, right click the channel screen again. </div>
(4) Hour Buttons	Select and click to playback the recorded video file on the specific time frame. <div data-bbox="97 1664 1501 1783" data-label="List-Group"> <ul style="list-style-type: none"> i The Hour buttons represent the time in 24-hour clock. The blue bar on top of the hour button indicates that there is a recorded video file on that period of time. If there is no recorded data within the hour, there will be no color bar on top of the hour button. While the red bar indicates that you are currently viewing the recorded video file. </div>
(5) Playback Control Buttons	<p>Begin: Move at the beginning of the recorded video file.</p> <p>Previous: Go back to the previous frame.</p> <p>Slower: Play the recorded video file at the speed of 1/2x, 1/4x, 1/8x, 1/16x, or 1/32x.</p> <p>Rewind: Wind back the video file.</p> <p>Pause: Briefly stop playing the recorded video file.</p> <p>Play: Play the recorded video file.</p> <p>Faster: Play the recorded video file at the speed of 2x, 4x, 8x, 16x or 32x.</p> <p>Next: Go to the next frame.</p> <p>End: Go to the end of the video file.</p>

Name	Function
------	----------

- (6) Archive
- Select the date on the calendar and the time from 00 to 23 to where to start playing the recorded video file.
- Also, user can open the recorded file from certain location by click **OPEN FILE** button
 - **Channel 01~ 16** and **Channel 17 ~ 32**: Click the button to switch to different channel group of playback calendar if the DVR has more than 16 channels.
 - Mark **Day Light Saving**, the playback calendar will show the available playback records during day light saving period.

i The numbers from 00 to 23 represent the time in 24-hour clock. The numbers from 01 to 04 represent the camera ID. While the red colored column indicates on where to start playing the recorded video file. If there is no any video data, it will be no color bar on top of the date button.

(7) Preview	Switch to Preview mode.
(8) Playback	Switch to Playback mode. This allows you to view the recorded video file.
(9) Status bar	Display the record date, time, HDD capacity in preview mode and play speed in playback mode.
(10) Camera ID	Show the number of cameras that are being viewed. When you are in single screen mode, click the camera ID number to switch and view other camera.
(11) Export	Export includes Snapshot, Print, and Output function. <ul style="list-style-type: none"> ■ Snapshot: Capture and save the screen shot either in *.jpg or *.bmp format. ■ Print: Print the screen shot. ■ Output: Save the segmented file in *.avi format (see also Chapter 8.4.1.1)
(12) Segment	Keep a portion of the recorded video you want (see also Chapter 8.4.1.1).
(13) Full screen	View in Playback-compact mode. To return, press the right button of the mouse or ESC on the keyboard.
(14) Event Log	Show the record of activities that take place in the system. To filter the records, select and click the option button to only display Event, System, Operation, Network or POS.
(15) Visual Search	Search from a specific camera by Date, Hour, Minute, 10 Seconds and Second. (See also Chapter 8.4.1.2)
(16) Find Next	Search for the next event or changes in the motion detector frame. You can use this when you are using Intelligent Search or Event Search function.
(17) Intelligent Search	Search the changes in the motion detector frame (See also Chapter 8.4.1.3).
(18) Audio	Enable/disable audio play
(19) De-interlace	To enhance the video quality. Set the de-interlace mode to #1, if you are capturing motionless picture and #2, if it captures lots of movement.

8.4.1.1 To Cut and Save the Wanted Portion of the Recorded Video

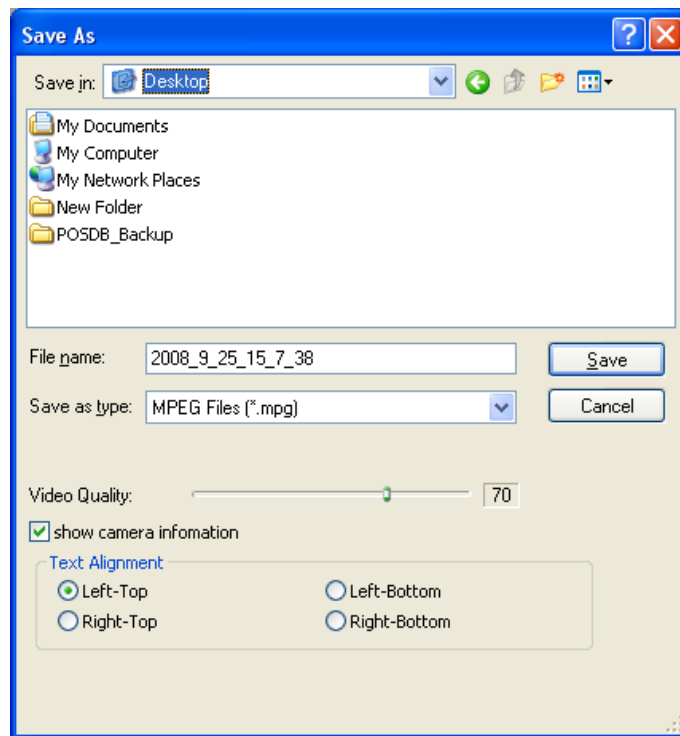

1. Use the Playback Control buttons or drag the bar on the playback progress bar and pause on where you want to start the cut. Then, click **Segment** to set the begin mark.

2. Use the Playback Control buttons or drag the bar on the playback progress bar and pause on where you want to end the cut. Then, click **Segment** to set the end mark. To cancel segmentation or set the segment marks from the start, click Segment button again.

3. Click **Export** → **Output** button to save the wanted clip.
4. In the Save As dialog box, locate on where you want to save the file.
5. Mark the **show camera information** and select the **Text Alignment** to display camera name when playback. The camera information will be the information of server name that user has defined in **Network Setting**.
6. Select the file type (*.dvr, *.mjpg, or *.avi) to save. If the select the file type is *.avi, user can mark **included audio** to include audio in output video segment.
7. To adjust **Video Quality** if needed.
8. Click **Save** to save the video segment.

8.4.1.2 To Search Using the Visual Search

1. Click **Visual Search**.
2. In the Visual Search Setting dialog box, select the Camera number and the date. Then click **OK**.

3. When a series of frames appear by date, click on the frame to display another series of frames and search by every Hour of that date, every Minutes of that hour, every 10 Seconds of that minute, every Second of that 10 seconds. To go back, click . To view from the selected frame and close event search, click .

8.4.1.3 To Search Using the Intelligent Search

1. Click on the video screen on where you want to search.
2. Click **Intelligent Search**. The Intelligent Search text (red) would appear at the lower left corner of the screen.

3. When the Intelligent Search Setting dialog box and motion detector frame appear, you may adjust the sensitivity bar and the motion detector frame size and location. To set motion detector frame size and location, left click and drag on the screen. Then, click **OK** to start searching. The video search would stop at the frame that matches the condition. To keep on searching click .
4. You may also set to search and list all the result. Just check the **List** box. In the **Search Duration** section, set the **Begin Time** and **End Time**. Set the **Searching Interval** time that system won't list out the same events in a period of time that user has setup. Then, click **OK** to start searching. The search result will show as below figure:

8.4.2 Familiarizing the Download and Playback Buttons

Name	Function
(1) Exit	Click to close the application.
(2) Progress bar	Show the progress of the file being played. You may move the bar to seek at any location of the track.
(3) Playback Control Buttons	<p>Begin: Move at the beginning of the recorded video file.</p> <p>Previous: Go back to the previous frame.</p> <p>Slower: Play the recorded video file at the speed of 1/2x, 1/4x, 1/8x, 1/16x, or 1/32x.</p> <p>Rewind: Wind back the recorded video file.</p> <p>Pause: Briefly stop playing the recorded video file.</p> <p>Play: Play the recorded video file.</p> <p>Faster: Play the recorded video file at the speed of 2x, 4x, or 8x, 16x or 32x.</p> <p>Next: Go to the next frame.</p> <p>End: Go to the end of the recorded video file.</p>
(4) Status bar	Display the recorded date, time and play speed.
(5) Language	Switch the language of function/button tips
(6) Export	Export includes Snapshot, Print, and Output function. <ul style="list-style-type: none"> ■ Snapshot: Capture and save the screen shot either in *.jpg or *.bmp format. ■ Print: Print the screen shot. ■ Output: Save the segmented file in *.mpg, *.avi, or *.dvr format (see also Chapter 8.4.1.1).
(7) Segment	Keep a portion of the recorded video (see also Chapter 8.4.1.1).
(8) Full screen	View in Playback-compact mode. To return, press the right button of the mouse or ESC on the keyboard. When you switch to full screen in multiple-screen mode, Left click to toggle to only display one of the video in the multiple-screen mode or all.
(9) Event Log	Show the record of activities that take place in the system. To filter the records, select and click the option button to only display Event, System, Operation, Network or POS.
(10) Audio	Enable/disable volume
(11) De-interlace	To enhance the video quality. Set the de-interlace mode to #1, if you are capturing motionless picture and #2, if it captures lots of movement.

Name	Function
(12) Watermark	When playback file from hard disk and *.avf file, click watermark to call out ImageVerification application(see also Chapter 7)

 Watermark verification doesn't support on hardware compression products, EB series DVR, and video that is recorded from IP camera.

Users can use a mobile phone to access the DVR through Internet. Make sure your mobile phone support IE browser and is connected to the internet. To access the DVR server, open IE browser and enter **http://DVR IP/mobile**. You can see the latest screen shot. Click << >> to change the channel or camera and **Refresh** to reload new screen shot.

9.1 Using PDAViewer to Access DVR Server

Users can also use a PDA to access the DVR through Internet. Make sure your PDA support IE browser and is connected to the internet. To use this feature, you need to install the PDA Viewer software either thru ActiveSync connection or download it from the internet. Please check if your PDA meets the 2 requirements below.

OS: MS Windows CE 4.0, PocketPC 2002/2003, Mobile 5 PDA version CPU: ARM architecture
--

9.1.1 To install PDAViewer thru ActiveSync

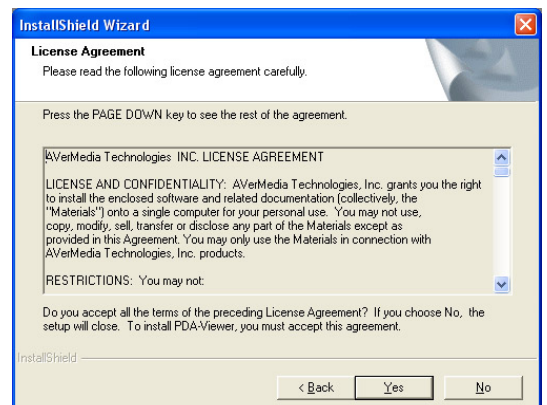

1. Connect your PDA to your PC. Place the CD into the CD-ROM drive then click **Utilities > PDAViewer > Setup.exe**. And follow the on screen instructions.

2. Click **Next** to continue.

3. Read the license agreement and click **Yes** to accept all the terms. The system will then automatically install the application.

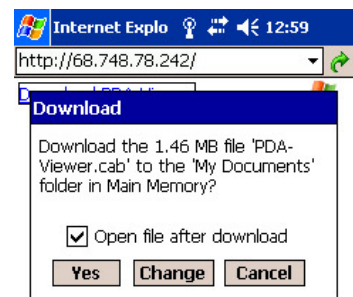

9.1.2 To install PDAViewer from the Internet

1. Make sure you are connected to the internet.
2. Open the web browser and enter the server IP. Then click the hyperlink **Download PDAViewer**.

3. When the Download dialog box appears, enable **Open file after download** and click **Yes**.

4. After the installation, the PDAViewer icon will appear in the Programs list.

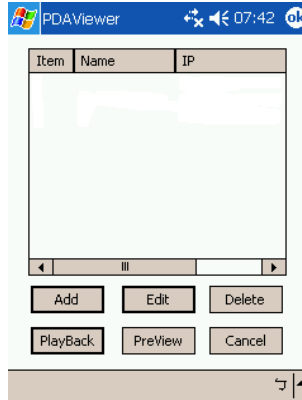

9.1.3 To Use the PDAViewer

1. Run the **PDAViewer** on your PDA.
2. Familiarizing the PDAViewer buttons.

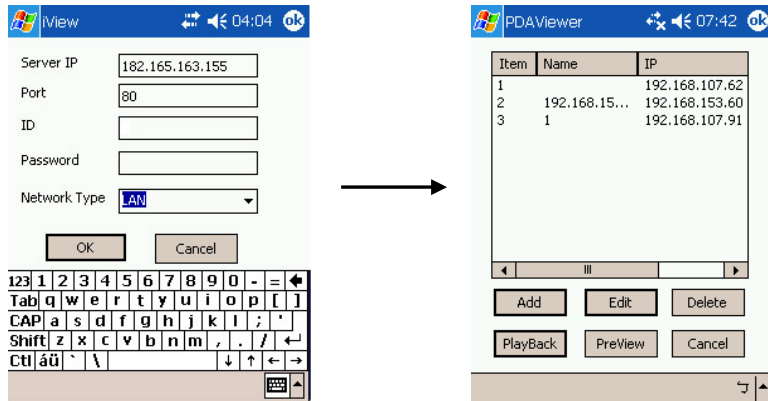

Name	Function
------	----------

(1) Connect Hook up to the DVR server. Make sure you are connected to internet. When the iView screen appears, click Add to add DVR server.

Enter the server IP, port, user ID, password and select the connection type. Then, click **OK**.

User can playback the recorded video from remote DVR server in PDAViewer.(see [Chapter 8.1.4](#))

(2) Split Screen Mode	Select between 2 screen display types. It also allows you to switch and view different camera number or channels.
(3) About	Display the PDAViewer software version.
(4) Minimize	Reduce the size to taskbar.
(5) Exit	Close the PDAViewer.
(6) Focus	Adjust the focus of PTZ camera to produce clear image.
(7) Full Screen	Use the entire screen to only display the video.
(8) Snapshot	Capture and save the screen shot in *.bmp format.
(9) Zoom	Zoom in and out the PTZ camera image.

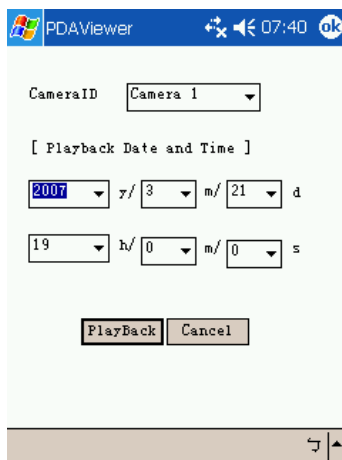

Name	Function
(10) Direction buttons	Adjust and position the focal point of the PTZ camera.

- To change the video quality, enable/disable audio, and select to display different camera, tap on the video screen longer the popup menu will appear.

9.1.4 To Playback in PDAViewer

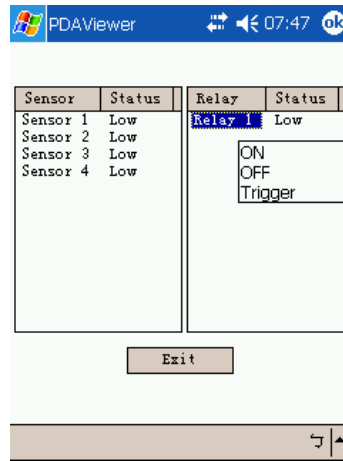

- Run the **PDAViewer** in the Programs.
- Hook up to the DVR server.
- Click **Connect** icon and select the DVR server
- Click **Playback** to enter playback option screen
- Select the **camera, data, and time**
- Click **Playback** to start playing the recorded video

- While playback, user can view and change status of I/O devices
- On the playback screen, tap on video screen longer the popup menu will appear
- Select the **Remote IO**

10. The sensor and relay devices will list as below:

11. User can change the relay status. Select the relay and tap on video screen longer the popup menu will appear, and then, select the status (ON, OFF, Tigger)

9.2 Using JavaViewer to Access DVR Server

Using the mobile phone within Symbian Smart Phone OS to access the DVR through Internet. Make sure your mobile phone supports Symbian Smart Phone OS and can be connected to the internet. To use this feature, you need to install the JAVA Viewer program that it can be downloading it from the DVR server through the internet.

9.2.1 To install JAVAViewer from the DVR Server

1. Open the web browser and enter the DVR server IP (http://DVR server IP: port/JAVA-Viewer.html). Then click **Connect**.
2. When the Download screen appears, select **JAVA-Viewer.jad** and download it to your mobile phone.
3. After the installation, the JAVAViewer will be in your mobile phone system. To find the JAVAViewer program where is located, please refer to your mobile phone user's manual.

9.2.2 To Use the JAVAViewer

1. Run the JAVAViewer program.
2. Enter the DVR IP address, port number, user ID, and password. Please refer to your DVR server setting for that information.
3. And then, select the Connect to connect to DVR server.
4. Click **Yes** to accept the data from DVR server.
5. When connection is success, you will see the camera video on the screen.
6. To switch to different camera view, select menu and select the channel.

7. The JAVAViewer support PTZ control function, you can refer to **Help** file for detail function control key. Select **menu** and go the way down to select the **Help** file.

WARRANTY NOTICE

LIMITED WARRANTY

AVerMedia TECHNOLOGIES, Inc. warrants this product to be free of defects resulting from faulty manufacture or components under the following terms:

WARRANTY LENGTH

Labor is warranted for (1) one year from the date of purchase

Parts are warranted for (1) one year from the date of purchase

Replacement products will be warranted for the remainder of the one year warranty period or (30) thirty days, whichever is longer

WHO IS PROTECTED

This warranty is enforceable only by the first consumer purchaser

WHAT IS AND IS NOT COVERED

Except as specified below, this warranty covers all defects resulting from faulty manufacturing of this product. The following are not covered by the warranty.

1. Any product on which the serial number has been defaced, modified, or removed
2. Damage, deterioration, or malfunction resulting from:
 - Accident, abuse, misuse, neglect, fire, water, lightning, or other acts of nature, commercial or industrial use, unauthorized product modification, or failure to follow instructions included with the product.
 - Misapplication of service by someone other than the manufacturer's representative
 - Any shipment damages (Claims must be made with carrier)
 - Any other cause which does not relate to a product defect
3. Cartons, cases, batteries, cabinets, tapes, or accessories used with product
4. AVerMedia does not warrant that this product will meet your requirements; it is your responsibility to determine the suitability of this product for your purpose

WHAT WE WILL AND WILL NOT PAY FOR

We will pay labor and material expenses for covered items. However, we will not pay for the following:

1. Removal or installation charges
2. Shipping charges
3. Any incidental charges

EXCLUSION OF DAMAGES

THE MANUFACTURER'S SOLE OBLIGATION AND LIABILITY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT OF A DEFECTIVE PRODUCT AT OUR OPTION. THE MANUFACTURER SHALL NOT, IN ANY EVENT, BE LIABLE TO THE PURCHASER OR ANY THIRD PARTY FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE (INCLUDING, BUT NOT LIMITED TO, DAMAGES RESULTING FROM INTERRUPTION OF SERVICE AND LOSS OF BUSINESS) OR LIABILITY IN TORT RELATING TO THIS PRODUCT OR RESULTING FROM ITS USE OR POSSESSION.

LIMITATIONS OF IMPLIED WARRANTIES

There are no other oral or written warranties, expressed or implied, including but not limited to those of merchantability or fitness for a particular purpose. Any implied warranties are limited in duration to one year from the date of purchase

STATE LAW AND YOUR WARRANTY

This warranty gives you specific legal rights, and you may also have other rights granted under state law. These rights vary from state to state
