

StreetSiren DoubleDeck with Brandplate

StreetSiren DoubleDeck is an outdoor siren that enables security service providers to print their logo and contact details on the Brandplate for display.

Looks distinct, sounds alike

StreetSiren DoubleDeck looks different from the original model. But it has the same features under the hood. The new siren generates a sound of up to 113 dB, uses an accelerometer to detect removal attempts, operates up to 5 years on pre-installed batteries, and can be powered from a 12 V DC supply.
