Congratulations on your

PROTECT M90™ DEMO SUITCASE!

Inside you'll find a complete demonstration kit, ready for customer presentations, installer training and technical setup. Whether you're meeting customers, training installers or showcasing the PROTECT M90™ at exhibitions, this kit has been carefully assembled to help you deliver professional and engaging demonstrations - wherever you go!

What's included:

PROTECT M90™ fog cannon
Our latest generation fog cannon, delivering powerful fog deployment with fast installation, intuitive setup and simplified servicing.

APEX fog fluid
High-performance APEX fluid for multiple demonstrations, producing thick, residue-free security fog.

Ceiling mounting plate
Metal mounting plate for secure wall or ceiling installation during demonstrations or permanent use.

Table brackets and handle
Custom brackets to securely mount the M90™ on a table, plus a handle for easy lifting and positioning.

Nozzles
A complete set of nozzles for demonstrating different fog distribution patterns and installation options.

Nozzle add-on
Nozzle extension, front plate and screws for quick configuration of different nozzle setups.

Remote control
Wireless remote for convenient fog activation during live demonstrations without an alarm system.

Tools
Torx T20, precision and 6 mm flathead screwdrivers for servicing, nozzle changes and basic configuration.

Power and service cables
230 V power cable (5 m) and USB A to B cable (2 m) for configuration, diagnostics and firmware updates using IntelliSuite™ 2.

Additional accessories
A 10 m extension cable provides extra flexibility when powering the unit during demonstrations.
