

FlexiScan SYSTEM.

reliable and **COST EFFECTIVE.**

The Impro FlexiScan is a reliable and cost effective access control system that eliminates the need for multiple remote controls or tags. It's a bit like the multi-tool of access control system, it does it all in one.

A single transmitter delivers multiple functions, with four separate outputs for equipment like alarms, automatic gates or electro-mechanical locks, as well as 4-digit PIN-code only access. The frequency code transmitted is encrypted and totally secure, eliminating the risk of Tag code copying or interference with the signal. This cost effective and easy to install system is ideal for small commercial and residential applications. The system is completely configured on the controller, so there is no

need for a PC or software and it can support up to 99 tag holders with vehicle and personal access.

FlexiScan delivers secure access control, ensuring tighter security with the ease of a single transmitter.

The FlexiScan is a cost competitive access control solution and its' price to feature ratio is unparalleled.

- Cost effective
- Simple to configure using 4 button controller
- Supports up to 4 access points
- 150m from Controller to Reader
- Support of up to 99 Tag holders
- Allows for a 4-digit PIN-code
